Anomaly II
(Perry prop.)
Line 3000 NE.
Hole 26.75 NW-(11-2)
Scale = 1" = 40'

Sulfide gr. size — % Sulfides

magnetism of po.
x = mild
xx = mod.
xxx = strong

Sulfidic zones
+ 10% sulfides — gen. po + py
po = mod. mag, occurs as blebs, small veinlets, and vtng dusting Py = blebs — veins the Po veins.
Sulfides almost always assoc. w/ graphite
