

2025 Oversized ATV Models*

Oversized ATV Registration Prohibited in Maine

It is unlawful to register an Oversized ATV in Maine. An ATV is considered oversized if it exceeds 65 inches in width and/or weighs more than 2,000 pounds, based on the manufacturer's specifications.

If you're unsure whether a specific ATV meets the definition of an Oversized ATV, start by checking the manufacturer's specifications in the original paperwork provided at the time of sale. You can also contact the manufacturer or dealership to confirm whether the machine exceeds size or weight limits using the Vehicle Identification Number (VIN). If you are still unable to determine whether a machine qualifies as oversized, please contact the Department at (207) 287-8000 or email info.ifw@maine.gov for further assistance.

**While this list includes all models identified to date, it may not reflect every oversized ATV. We will continue to update it as new models are confirmed, so please check back regularly for the latest information.*
