# GREEN POND

Oxford Twp., Oxford Co.  
U.S.G.S. Mechanic Falls, Me. (7.5')

## Fishes

Largemouth bass  
White perch  
Yellow perch

Hornpout (bullhead)  
White sucker  
Pumpkinseed sunfish

## Physical Characteristics

Area - 38 acres

Maximum depth - 28 feet

Temperatures:

Surface - 79°F

27 feet - 59°F

Principal fisheries: Largemouth bass, white perch

Green Pond is located south of Hogan and Whitney Ponds in Oxford, Maine. Although this pond is fairly deep and quite cold near the bottom, the water quality is not well suited for trout management. Water deeper than 15 feet is either too warm or lacking sufficient dissolved oxygen to support a trout fishery.

Largemouth bass have become well established since their illegal introduction in the early 1970's, and continue to provide a good fishery.

Access to Green Pond is restricted to permissive trespass as there is no public access site.

Surveyed - September 1957
