

CRYSTAL LAKE
Hersey Twp., Aroostook Co.
U. S. G. S. Island Falls, Me.

Fishes

Brook trout (squaretail)	Minnows
Yellow perch	Blacknose dace
Chain pickerel	Common shiner
Hornpout (bullhead)	Fallfish (chub)
Eel	Creek chub
White sucker	Redbreast sunfish

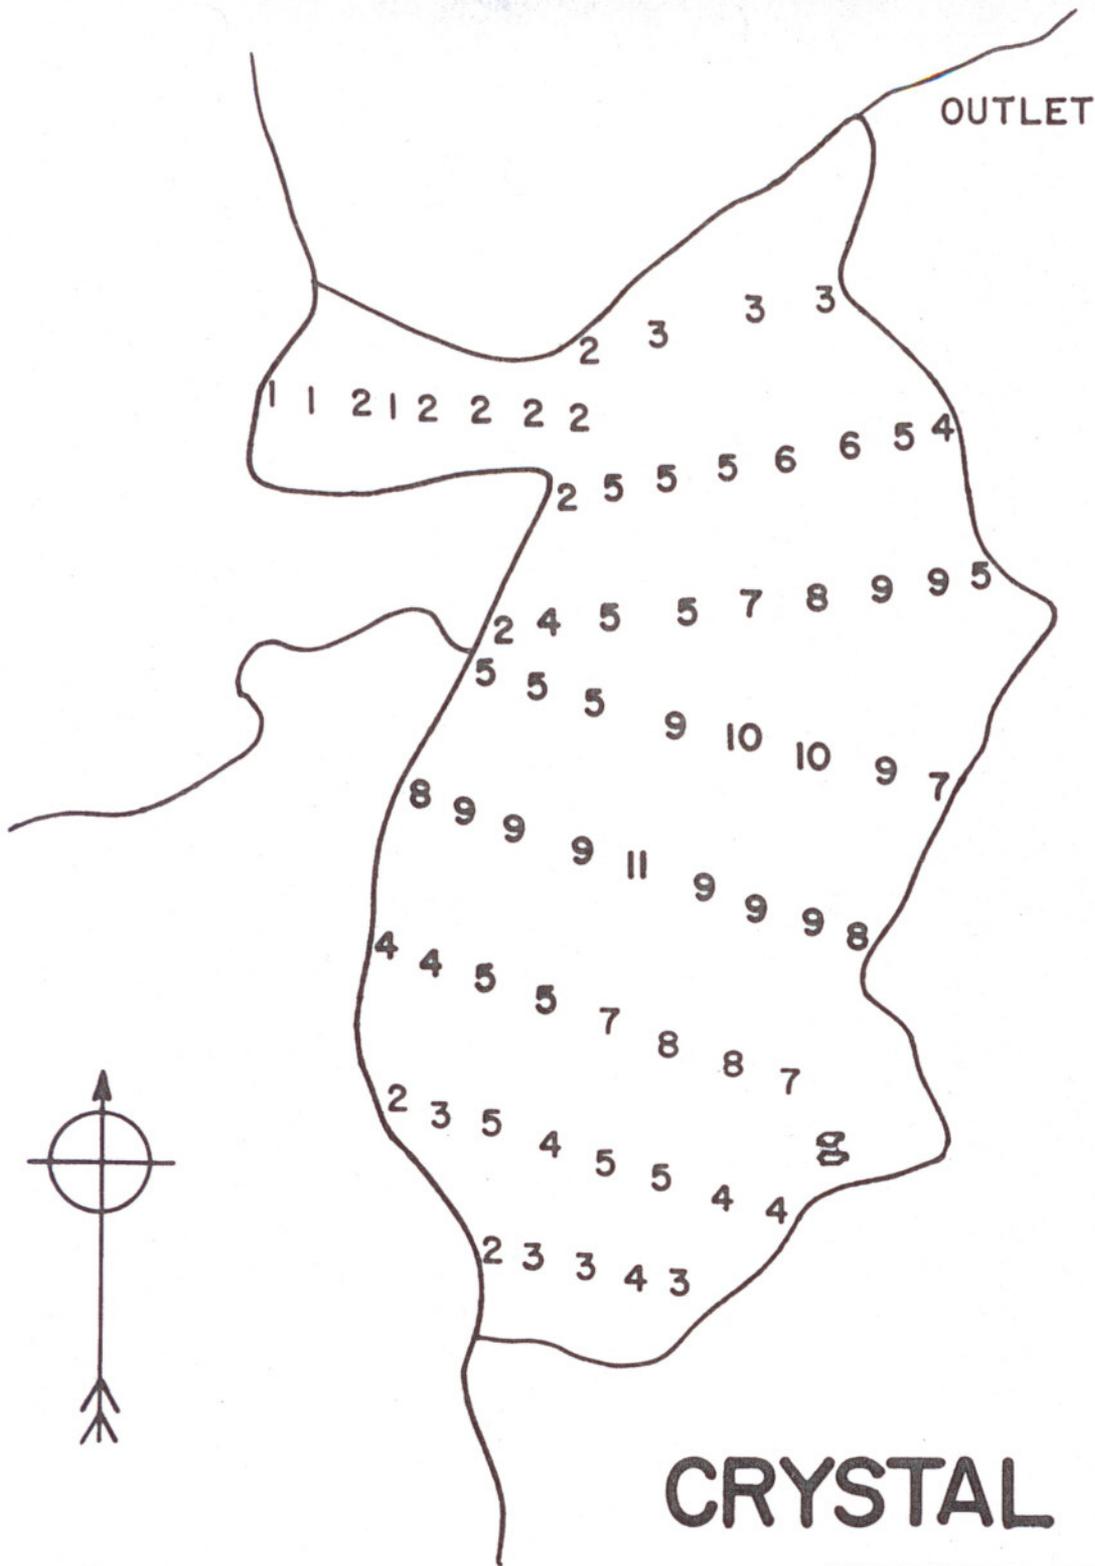

Physical Characteristics

Area - 137 acres	Temperatures
	Surface - 75° F.
Maximum depth - 11 feet	10 feet - 75° F.

Water quality in Crystal Lake is ideal for chain pickerel, and a good population of this species is present. There is an abundance of shallow weedy area, and good forage fish populations are present. The pond should be managed primarily for pickerel.

Occasional brook trout are taken, but trout production is seriously limited by the many competing fishes in the lake. The main inlet, Crystal Brook, contains excellent trout spawning and nursery area.

Crystal Lake is accessible by a one-mile jeep trail.
