

LINDSAY LAKE
Easton Twp., Aroostook Co.
U. S. G. S. Mars Hill, Me.

Fishes

Brook trout (squaretail)
Eel
Minnows
Redbelly dace

Minnows (Cont'd)
Blacknose dace
Pearl dace

Physical Characteristics

Area - 6 acres

Maximum depth - 4 feet

Temperatures

Surface - 75° F.
4 feet - 74° F.

Lindsay Lake is shallow with equal water temperatures at all depths during the summer. Trout maintain themselves during warm periods by seeking spring areas.

Trout are very abundant in the outlet, Riviere des Chutes, but upstream migration into the pond is hindered by many beaver dams. Trout production is further limited by the presence of competing minnows and eels and marginal water quality.

Any additional kinds of fish would provide more competition for trout.
