U.S.G.S. Lead Mountain, Me. (7 ½')

Fishes

Yellow perch
Chain pickerel

White sucker

Physical Characteristics

Area – 32 acres

Temperatures

Maximum depth – 19 feet

Surface – 70 F

19 feet – 48 F

Principal fishery: Chain pickerel

Chalk Pond is a warm, shallow, weedy water located near the intersections of Route 9 and 193. A walk-in access site is located at the pond's extreme southwest end, off Route 193.

The pond supports numerous of 12 to 19 inch chain pickerel and small yellow perch, which provide fast action for anglers both summer and winter. As such, it's a good place to take youngsters fishing, where they're sure to catch fish. When fishing, concentrate your efforts of the eastern side of the pond, as the western side is extremely shallow.

Surveyed – September, 1985
