Brook trout (squaretail)	Chain pickerel
Brown trout	Hornpout (bullhead)
Smallmouth bass	Smelt
Largemouth bass	Eel
White perch	White sucker
Yellow perch	Minnows
	Sunfish

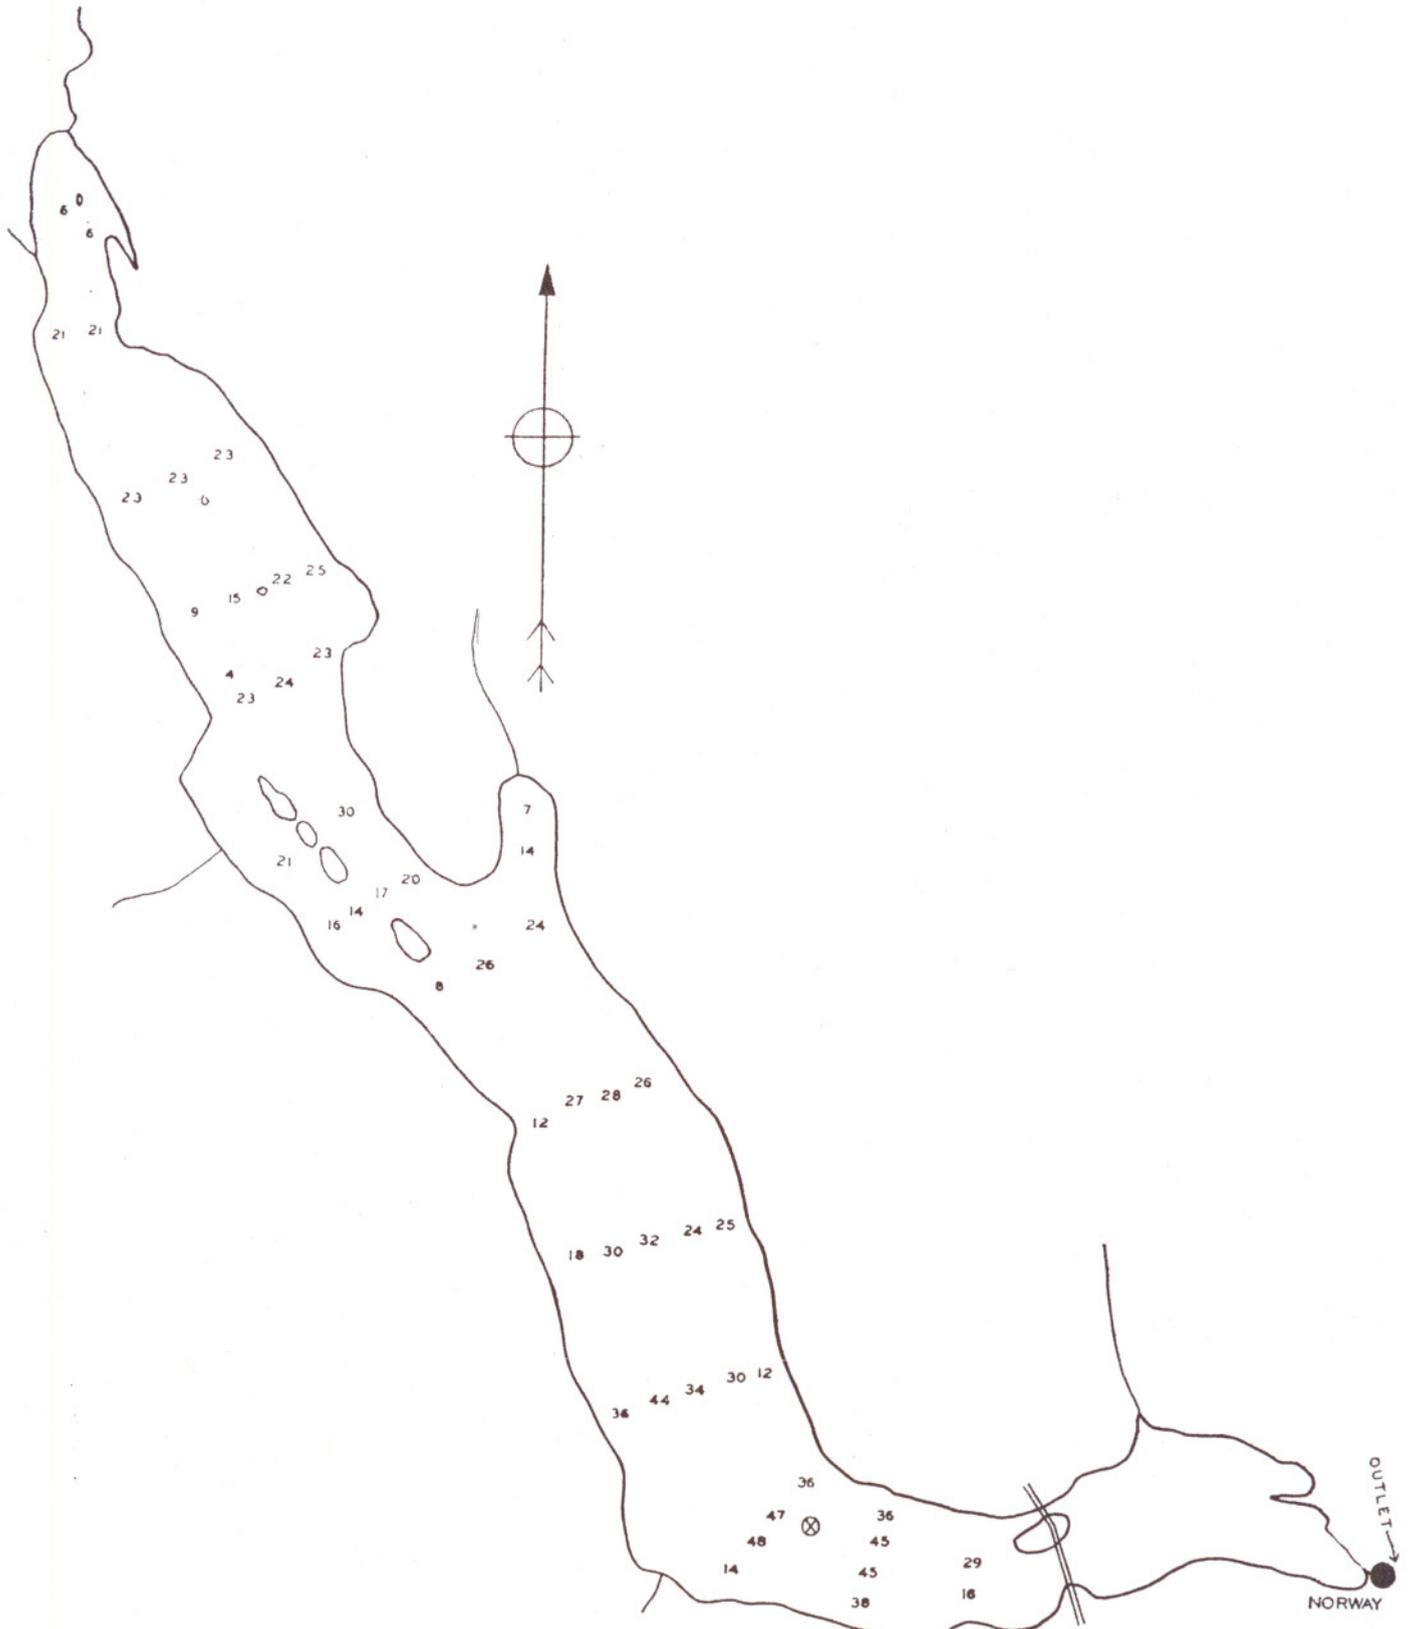

Physical Characteristics

Area - 922 acres	Temperatures
	Surface - 74° F.
Maximum depth - 48 feet	47 feet - 51° F.

Suggested Management

Since there is an abundance of smallmouth bass and white perch already present in Pennesseewassee Lake, management should be primarily concerned with these two species. However; reports indicate that some fishing is enjoyed for brown trout and brook trout. These two species should also be considered in the management of the lake.

Liberalized fishing for bass and perch might produce more trout fishing by controlling the populations of warm-water species.
