

PATTEN POND

Hampden Twp., Penobscot Co.
U.S.G.S. Hermon, Maine.

Fishes

White perch	White sucker
Yellow perch	Hornpout (bullhead)
Chain pickerel	Pumpkinseed sunfish
Minnnows	American eel
Golden shiner	

Physical Characteristics

Area - 46 acres	Temperatures
	Surface - 73 ⁰ F.
Maximum depth - 12 feet	12 feet - 68 ⁰ F.

Principal Fishery: White perch, Chain pickerel

Patten Pond is located in the upper Souadabscook River drainage. Patten Pond is a relatively large shallow pond with an abundance of aquatic plants along the shoreline, thus contributing to the ponds abundant warmwater fish populations. Beaver dams in the outlet will help to stabilize the water level in the pond, but could also jeopardize the movement of other fish species coming up from Ben Annis Pond like black crappie. The best way to access Patten Pond is to put in at the North road crossing and canoe up the outlet.

Surveyed - August, 1966
