Hornpout (bullhead)
Redbreast sunfish
Pumpkinseed sunfish
American eel

Physical Characteristics

Area - 106 acres

Maximum depth - 42 feet

Temperatures:

Surface - 73°F
39 feet - 48°F

Principal fisheries: White perch, chain pickerel

Barker Pond is located northeast of Waite Hill. It has no major inlet, but an outlet, Tuttle Brook, flows southeast into Black Stream and Great Moose Lake. The pond's shoreline is undeveloped.

Water quality in Barker Pond is poor for coldwater gamefish. Water temperatures reach critically high levels during the warm summer months. Warmwater fish species thrive in these conditions and provide anglers with fishing opportunity. The pond is not stocked.

Barker Pond is accessible via a short dirt road off Route 43. The pond is open under general law in both the summer and winter fishing seasons. See the lawbook for additional regulations.

Surveyed - July, 1961
