

## HORSESHOE POND

T 3 R 5 BKP WKR., Somerset County  
U.S.G.S. King and Bartlett Lake, Maine (7½')

### Fishes

Brook trout	Creek chub
Minnnows	White sucker
Redbelly dace	

### Physical Characteristics

Area - 29 acres	Temperatures
	Surface - 54°F
Maximum depth - 20 feet	20 feet - 39°F

Principal fishery: Brook trout

Horseshoe Pond is located north of Spencer Stream and south of Black Nubble. It has two rocky inlets flowing into the north and west sides. The rocky outlet flows east into Spencer Stream. The shoreline is undeveloped.

Water quality for coldwater species is fair with most of the pond being shallow. A small area of deeper water is deficient in oxygen. There is limited spawning gravel for brook trout at the mouth of the north inlet.

Horseshoe Pond is accessible by a trail leading from private gated roads. The pond is open to general law fishing in the summer.

Surveyed - August, 1981
