

BOYD POND

Limington Twp., York Co.
U.S.G.S. Limington, Me. (7 1\2')

Fishes

Largemouth bass	Hornpout (bullhead)
Yellow perch	Pumpkinseed sunfish
Chain pickerel	Black crappie
Minnows	
Golden shiner	

Physical Characteristics

Area - 26 acres	Temperatures
	Surface - 77°F
Maximum depth - 19 feet	17 feet - 55°F

Principal Fishery: Largemouth bass, black crappie, chain pickerel

Boyd Pond is a shallow body of water almost entirely surrounded by a quaking bog. Much of the water surface is covered with aquatic plants. The water quality is not suitable for coldwater fisheries management, but the pond provides excellent habitat for warmwater species.

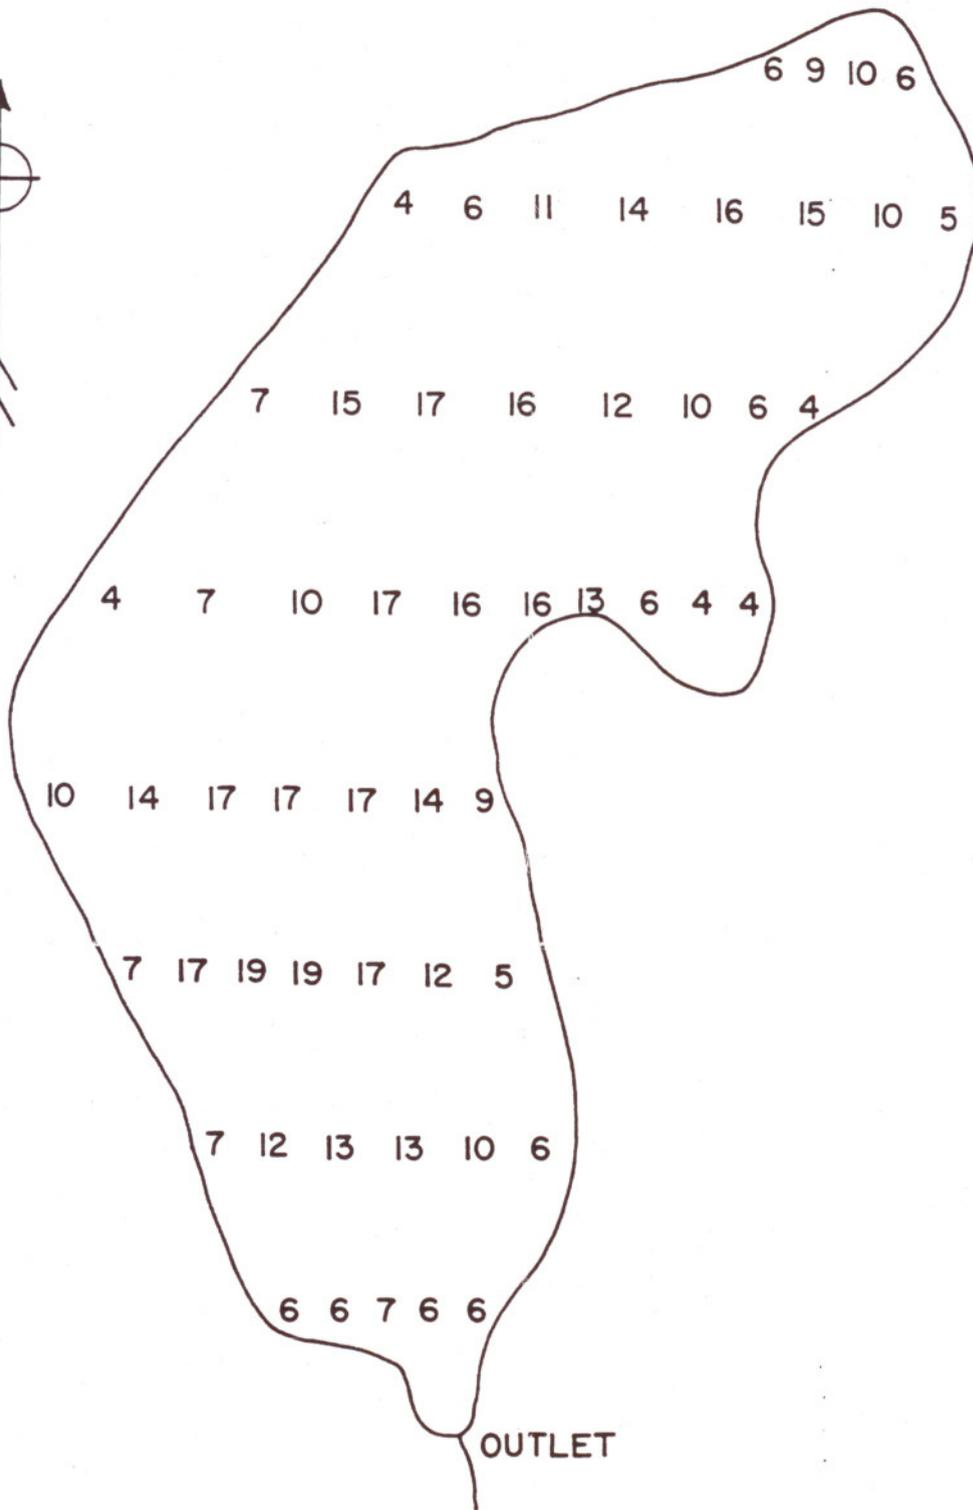

Black crappies, which have recently been illegally introduced, are thriving and are producing an excellent fishery. Currently, Boyd Pond is open to fishing both summer and winter.

Access to Boyd Pond is limited to walk-in across private property.

Surveyed - August, 1962
