PRE-QUALIFIED FOR Landscape architectural

STATEMENT BY FIRM The firm of Barry J.Hosmer - Landscape Architect was formed in 1992 to provide clients in Maine and New England the personalized attention and detailed thought that each project deserves, no mater the size. With over thirty years of experience, serving private, public and governmental entities and a large breadth of work completed, I feel my firm can provide for the diverse needs of almost any client. In the truest sense of a landscape architectural design practice, my philosophy takes its inspiration from the landscape itself. All projects, from the micro landscape to the macro, seek to tie themselves to their surroundings through composition, materials, plantings and iconography. All of my projects receive this same attention, from simple commercial sites to complex master plans. Ares of experience include planning, permitting, design, habitat restoration and construction services.
