CONTACT PERSON Harry W. Hepburn IV

NUMBER OF EMPLOYEES

STATEMENT BY FIRM Until recently, Briburn was the Green Design Studio of Yarmouth Maine. Near the end of 2012 Christopher Briley and Harry Hepburn partnered to form a new company with increased architectural abilities and experience in a range of project types. For seven years, the Green Design Studio specialized in energy efficient, environmentally friendly design, and completed several LEED certified projects. Now, as Briburn, the commitment to sustainable design is even greater. We understand the many tasks required to create a successful project, we are thoughtful, innovative thinkers, often developing unique ideas specific to your projects needs. Currently, Briburn is completing a passivhaus / net zero home in Saco, we are about to begin construction on a sustainable Veterinary Clinic in Cumberland, and we are in the early design phase for a near net zero mixed use commercial project in Brunswick; which includes an aquaponics/urban farm on the roof, restaurant and six townhouse style apartments.
