PRE-QUALIFIED FOR Architectural

STATEMENT BY FIRM Dextrous Creative is a multi-disciplinary design firm based in Portland, Maine working to develop innovative solutions for clients, balancing feasibility, desirability and viability. We've learned that defining light-bulb moments in a project often originate with clients and their stakeholders. Our work is community-oriented, champions transparency and consensus-building by engaging a wide-variety of constituents early-on in a project's development. We believe these practices can reduce conflicts, pricey delays and late-project design changes. Our experience encompasses a wide variety of commercial, residential work and construction types; from renovations of post-and-beam structures and light-frame construction to tenant fit-outs and institutional buildings. Founding Principal, Tracie Reed, is a certified substitute teacher, teaching bike and pedestrian safety to students in the Greater Portland area with the Bicycle Coalition of Maine. She also substitutes in grades K-12 in the Portland Public School system and teaches school enrichment programs at Waynflete School. She has worked on Master Educational Plans for schools including: Thornton Academy, Brunswick's Coffin Elementary and Junior High Schools, Freeport High School, Region 10 Technical High School and accessibility/security upgrades at Gilbert Elementary School in Augusta.
