NUMBER OF EMPLOYEES 5

STATEMENT BY FIRM Eric Chase moved his practice to Brooksville, Maine from Branford, Connecticut, in 1997. This practice, Eric A Chase Architecture, was immediately engrossed in coastal residential work, but, in the interest of being involved in the community of downeast Maine, they opted to take on library, town hall, and health care projects as well. In Connecticut, Eric Chase worked on municipal and state, school, health care, historic preservation, as well as custom residential architecture. Douglas McMillan worked for three architecture firms in Washington D.C. on single-family homes, town houses, commercial, religious, hotel and office projects. He worked on all phases, from zoning and feasibility studies through design, construction documents and construction administration. While with the office of Vlastimil Koubek he was a job captain in the historic restoration and expansion of the Willard Hotel and the new office building next door. A registered architect since 1979 Mr. McMillan also has an M.B.A. and spent several years analyzing commercial properties for investment. Scott Blanchard moved to Maine over 20 years ago with 15 years experience in commercial and industrial projects. Since in Maine, he has designed and managed school, civic, health care, and residential projects. He has been with Eric A Chase Architecture for the past 9 years. Beth Somers has developed a very strong specialty of interior design, including cabinets, lighting, and finish materials and color. Our practice considers itself a perfect match for smaller (under \$3 million) custom projects requiring extensive client – architect cooperation. Because of a strong construction background, we also work very well with the contractors and trades.
