STATEMENT BY FIRM Fitzmeyer & Tocci is a full-service MEP engineering firm with specialized expertise in a diverse range of institution and facility types, including academic, healthcare and science and technology. We are a Corporation that has been in business for 54 years. From concept through construction, we are committed to forming lasting partnerships with architects, owners and construction managers while providing logical, clear and concise intelligence in a rapidly changing building facility environment. Our collaborative approach and model of multi-discipline engineering teams result in improved coordination, quality and solutions that make your project a greater success.
