STATEMENT BY FIRM Integrated Energy Systems, PLLC is an engineering firm which provides innovative HVAC and plumbing design, energy auditing, and commissioning. The focus is to reduce fossil fuel consumption through efficient building systems and renewable energy. The firm provides energy modeling, renewable energy consulting, and design services for biomass boilers, ground source heat pumps, solar, HVAC, plumbing, fire protection, and controls. In addition, the firm provides indoor air quality investigations, data logging, ultrasonic flow metering, and building envelope consulting. The firm is led by Richard Grondin, PE who has twenty-seven years of experience in engineering, project management and construction.
