NUMBER OF EMPLOYEES

STATEMENT BY FIRM Jones Associates, Inc., (JAI) is an environmental, surveying and forestry consulting firm established in 1988 by Rick Jones. JAI's services include: environmental permitting; wetland delineation and wetland mitigation design and implementation; Biological Assessments; vernal pool assessments; Stream Assessments Stream restoration plans and implementation; wildlife studies; forest management plans and prescriptions; erosion control and permit compliance; land surveying; GPS surveying; GIS creation and support; and GPR ground penetrating radar. For more than 20 years, JAI has worked with the private (commercial, industrial and individual landowners) and government sectors (federal, state and municipal). JAI's highly qualified professionals are experienced in explaining their findings before various forums. Our success is built on identifying potential environmental impacts and designing balanced solutions that are both environmentally sound and economically efficient. Projects designed and managed by JAI have varied in complexity from single-issue land use questions to multi-faceted resource evaluations requiring inter-agency review. Our knowledge of state and federal environmental rules and regulations, backed by a strong working relationship with government agencies, bolsters a reputation for reliable and comprehensive technical services.
