PRE-QUALIFIED FOR Structural engineering
STATEMENT BY FIRM Lincoln/Haney Engineering Associates, Inc. is a structural engineering firm, with a broad background in design, repairs, and renovations of structures of all types. We are active in the design of steel, reinforced concrete, timber, aluminum, stainless steel, prestressed concrete, and post-tensioned concrete. We are also active in the evaluation and renovation of façade systems and other aspects of building envelope design. While our primary focus is buildings, we also design pier and structure design for coastal flood zones and we design support systems for an international yacht repair company.
