NUMBER OF EMPLOYEES

STATEMENT BY FIRM Resurgence Engineering and Preservation, Inc. provides structural engineering expertise on historic buildings and structures for clients in Maine. Alfred H. Hodson III, P.E. is a civil engineer (structural emphasis) with a Masters degree in structures and a Certificate in Historic Preservation from the University of Virginia. Clients include state agencies, municipalities, school departments, architects, historical societies, and private owners. Capabilities include evaluation and inspection of buildings and structures, structural design and analysis, and construction administration services. Resurgence Engineering has provided masonry assessment and restoration specifications for many historic fortification structures and clock towers in Maine. Resurgence Engineering also has experience with assessment and replacement of existing athletic field bleacher and press box structures.
