RE: 9th round ConnectME grant pre-application process – Cooper, Maine

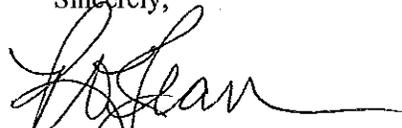

Dear Phil:

FairPoint is considering applying for a ConnectME grant to deploy broadband in Cooper, Maine. We would deploy broadband to unserved areas where FairPoint does not already provide broadband service. The proposed project would cover approximately 118 working lines and any dwellings that might be within those working lines. The total cost of this build-out is approximately \$314,000. Should we move forward with the grant application, we would be requesting a 68 percent grant. As far as we can determine, this area does not have landline, cable, or fixed wireless broadband service.

FairPoint would propose to provide digital subscriber line (DSL) broadband service at speeds ranging from 1.5Mbps to 15Mbps, depending upon loop length and the specific service ordered by customers. FairPoint would complete installation of this service within 12 months after receiving grant approval.

If I may provide additional information or assist you in any way, please don't hesitate to contact me at (207) 233-9375 or rtulk@fairpoint.com.

Sincerely,

A handwritten signature in black ink, appearing to read "Roseann", with a long horizontal flourish extending to the right.
