LUPC - DOWNEAST

October 7,2016

Hello

Just a few last thoughts Thanks again for holding the meeting. I know I never provided any criteria for A or B. but I believe I didn't have to. Because according to what you have already that is what you have accumulated between what the LUPC and the PPDLW had.

What was it a 154 pages from them. They presented the same scenio's as last time.

Like I said I want to know why anyone would want to remove Carroll Plantation from the Expedited Wind Area if it is already zoned for it? And if it doesn't make a difference even if they are removed they can still get back in,so why the big hoop la to start with? This topic should of never ever been brought up. As we know I never got an answer from the commission. I do know that from listening if we are removed and anything that comes in has to be rezoned. I believe I heard that in being rezoned it would be a harder process to get.

What I spoke came from my heart and I sincerely believe that the commission was actually listening to me. I didn't stand there just for my sake. I was standing there for the Town of Carroll's sake. We need to keep the doors of opportunity open for what ever might come along. Make it easier for them and not have to file so much paper work. this one step of leaving Carroll Plantation in the Expedited Area is that first step.

Read again what my first letter said about Scenic Impact that in truth is what I believe. There is no other reason and this should not of been a reason either to have Carroll Plantation closed to Wind.

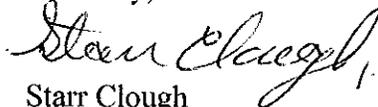

One other thing that comes to mind is when they mentioned the wind blowing in the wrong directions and wouldn't provide enough wind speed really? Have you ever been up on that mountain when the wind is really blowing?

We really shouldn't rely on what the PPDLW has to say about anything they said not one good thing for the Town of Carroll it was all about the tourism and how they and the guides rely on them to make them money. Nothing to do with Carroll. They never once mentioned anything for the Town. It was about them. How they ride their boats,side by sides,bikes,their primitive cabins and etc.Again they provided NO "real" value to my Town. Another one of the people that spoke against us, about a certain man. All I could here was jealousy. this man was "actually" jealous of him. The one man that was sent to help us get these Wind Towers.

I thought it was a good point when one of the commissioners asked about the cell towers and the red light on top blinking. and the answer. Well it isn't any different if its 1 blinking light for a cell tower than it is for a wind mill with a blinking light. Right?

I'll "PRAY" that you see it our way. Here our cry and and Don't Remove Us From the Expedited Wind Area.

Sincerely,

Starr Clough

10/14/16 DOWNEAST

Lupc,

We take this time to say thank you for taking the time to hold the hearing on Sept. 28, 2016, for Carroll plt. We hope that after you heard testimony from our point of view <sup>when</sup> ~~you~~ <sup>in</sup> making your decision you <sup>have taken notice</sup> ~~noticed~~ we spoke from the heart. We spoke for the goodness of our community to have a future ahead. We didn't speak of a personal grudge against wind officials and we didn't speak from offence of seeing lights on top of a mountain, we spoke to say don't remove us from the expedited wind zoning area. We have the chance that the mountain a (natural resource) can for once be of economic growth. If we are to be removed it's like pulling the rug out from under us and watching us die a slow and longful death. Let's us have this opportunity for the future, like we have said before it doesn't matter what kind of change is yet to come rather it be, wind, solar, a bud factory or even a nation park some one will be offended.

As we close we hope we have gained your understanding and will let Carroll Plantation

remain in the expedited wind zoning  
Area. Thanks again for your  
time.

Forever Carroll Strong,  
Ashley Worster
