Cold-air Talus Slope

**State Rank S2**

**Community Description**
This boreal assemblage is characterized by patchy mats of dwarf shrubs among the rocks, with scattered and stunted spruce (usually black spruce). Labrador tea and black crowberry are the most characteristic shrubs. Herbs are very sparse. Foliose and fruticose lichens are often extensive.

**Soil and Site Characteristics**
Sites occur near the base of somewhat sheltered or north-facing talus slopes where cold air collects. They are usually steep, though sometimes approaching level. The substrate is large talus blocks with pockets of organic duff among them. Ice blocks may persist into the summer in rock crevices.

**Diagnostics**
Sites occupy the base of talus slopes; mats of Labrador tea and other heath shrubs are characteristic, as are abundant fruticose and foliose lichens.

**Similar Types**
Spruce Talus Woodlands lack the abundant Labrador tea characteristic of this community and also have fewer reindeer lichens. Other spruce woodland types (Red Spruce - Mixed Conifer Woodland and Black Spruce Woodland) have higher tree cover (>25%) and lower bryoid cover. Heath - Lichen Subalpine Slope Bogs are similar, but have more continuous vegetation, peat accumulation, and occur on upper slopes at higher elevations.

**Conservation, Wildlife, and Management Considerations**
Known sites are on public lands or private conservation lands. One of the better known sites, Mahoosuc Notch, is traversed by the Appalachian Trail. Heavy foot traffic has caused some damage to the vegetation, but the community remains generally intact.

The long-tailed shrew and rock vole may show a preference for these rocky habitats.

**Distribution**
Restricted in Maine to northern and montane areas; New England - Adirondack Province extending west and likely northeastward to the Gaspé Peninsula.

**Examples on Conservation Lands You Can Visit**
- Deboullie Ponds Public Lands – Aroostook Co.
- Mahoosuc Public Land Unit – Oxford Co.

**Landscape Pattern: Small Patch**

**Characteristic Plants**
These plants are frequently found in this community type. Those with an asterisk are often diagnostic of this community.

**Sapling/shrub**
Black spruce

**Dwarf Shrub**
Black crowberry*
Labrador tea*
Lowbush blueberry
Mountain cranberry
Sheep laurel

**Herb**
Rock polypody
Bryoid
Reindeer lichen*
