

Lincoln County Regional Planning Commission FEMA FIRM map/SLR ordinance provision outreach

PARTNERS

Maine Geological Survey

PROJECT DESCRIPTION (completed December 2017)

This project developed a Google Earth based application that will allow local officials and property owners to visualize the extent of flooding potentially associated with rising seas based on newly issued FEMA FIRMS for Lincoln County.

There are 12 coastal municipalities in Lincoln County that have enough flood zones that may be candidates for the project in addition to Monhegan, an Unorganized Territory (UT) under the jurisdiction of the Land Use Planning Commission.

This project evaluated on a case-by-case basis whether or not the 0.2% storm would be a better vehicle than the 1% storm and then create suitable ordinance provisions. If the 0.2% storm is better it would create some uncertainties as far as work effort is concerned since none of the towns now have any information on it. LCRPC met with Planning Boards and Boards of Selectmen to review the sea level rise-flood maps and discuss suggested ordinance amendments.

LCRPC prepared amendments to local flood ordinances to allow communities to better protect new construction from sea level rise and will meet with planning boards and boards of selectmen as appropriate
