Nearby Destinations
Solon Public Lands in western Maine’s Northern Region have many attractions including the Maine’s Western Shore Region, the Famous Seboeis Public Lands, and the Outrolet Stream Trail. This brochure was made possible in part by funding assistance from the Federal Highway Administration’s Recreational Trails Program, administered by the Maine Bureau of Parks and Lands.

Services & Facilities
- 16 primitive campsite permits and a $20 non-refundable fee at Seboeis Public Lands, plus the cost of state park land permits.
- Seven campsites are accessible by water only.
- Public lands in search of deer, moose, bear and waterfowl.
- Bass and chain pickerel are caught in Seboeis and Endless lakes.
- Visitors may spot snowshoe hare, ruffed grouse, coyote, and terns all rely on the lake’s abundant fish as a vital food source.
- The Property History section discusses the historical significance of the Seboeis Public Lands.
Visitor Rules

• Keep pets on leash when walking along lakeshores.
• Keep marina areas free of debris by properly disposing of trash.
• Secure garbage so as not to attract skunks and raccoons.
• Keep pets on leash when walking along lakeshores.
• Do not leave campsite contents exposed.
• Use lead-free sinkers and jigs: lead poisoning is the leading cause of death for adult loons in Maine. Properly dispose of fishing sinkers.
• Secure garbage so as not to attract skunks and raccoons.
• Keep pets on leash when walking along lakeshores.
• Do not leave campsite contents exposed.
• Use lead-free sinkers and jigs: lead poisoning is the leading cause of death for adult loons in Maine. Properly dispose of fishing sinkers.
• Secure garbage so as not to attract skunks and raccoons.
• Keep pets on leash when walking along lakeshores.
• Do not leave campsite contents exposed.

Special Considerations

Water levels in Seboeis Lake can fluctuate several feet due to dam operations. Water levels influence where the lake bottom is visible at the surface. Low water levels may diminish boating opportunities in dry seasons. When low water levels occur, lake bottom is strewn with large boulders and stumps that may not be visible at shallow water. Low water levels may also limit boating opportunities in certain areas. Pets in campsites must be leashed and attended; outside of campsites, pets must be under control. The region's abundant moose, bear and other large animals can create hazards when in close contact with people (or their pets). Be aware of moose traffic (especially at dawn or dusk) and do not attempt to feed or pet them. Pets and wildlife are both wild animals and must be treated with caution and respect.

Legal Anchorage Areas

Any loose monofilament line you find. Use lead-free sinkers and jigs: lead poisoning is the leading cause of death for adult loons in Maine. Properly dispose of fishing sinkers.

Secure garbage so as not to attract skunks and raccoons.
