**5.0 FACILITY'S INTENDED USE**

As described extensively in Attachment 1 of this application, SPO and NEWSME intend the JRL to continue to provide disposal capacity for the same waste streams that are presently accepted at the Landfill and any future non-hazardous waste streams that should necessitate disposal. The proposed JRL Expansion Project will both replace the regional solid waste disposal service that ended with the December 2009 closure of the Pine Tree Landfill in Hampden, Maine, and provide long-term State-wide disposal capacity for the next 20 to 25 years that is not presently available elsewhere in the State.
