

**NUMBER NINE WIND FARM
MDEP NRPA/SITE LOCATION OF DEVELOPMENT COMBINED APPLICATION**

Section 24.
Sunlight

**SECTION 24.
SUNLIGHT**

Structures associated with the Number Nine Wind Farm (Project) are limited to wind turbines; utility poles, conductors, and associated hardware for the overhead collector line and overhead generator lead lines; meteorological towers; an electrical collector substation; and an Operations and Maintenance building.

No portions of the Project will block access to direct sunlight for other structures using solar energy through active or passive systems.
