To whom it may concern,

I am writing in support of Waste Management’s application for a public benefit determination for their Phase 14 expansion.

Waste Management Norridgewock landfill expansion is vital to the survival of Central Maine Disposal, along with its 44 employees, their families, and our thousands of customers. As a company we cannot afford to and do not have the capacity to go to further places like Old Town for trash disposal, nor could our customers afford for us to do this. Not having the landfill locally in Norridgewock would force us to double our fleet and increase our customer rates to continue to provide our services.

Waste Management Norridgewock is a very professional landfill. They are clean and orderly and appear to take pride in how they run the facility. They have a number of strict rules that favor their neighbors as well as anyone in the landfill, from hours of operation, to safety training. It is in our opinion that it is a professionally run operation.

Central Maine Disposal, CMD, is a small family business that has a good relationship with the Waste Management Norridgewock employees and families. We have always strived to give back to our community as has Waste Management. CMD is actively involved, along with other local businesses, on building and providing funding for the Cole Family’s new house in Norridgewock. Waste Management Norridgewock is one business that has been more than helpful with this project as well. They are a key player in this community and would be missed if they were gone.

Thank you for your time.
