Re: WMDSM Response to Supplemental Evidence & Motion to Dismiss

Dear Chair Draper:

On behalf of the Licensee Waste Management Disposal Services of Maine, Inc. (WMDSM), enclosed please find (i) Licensee's Response to Appellant's Proposed Supplemental and Other Non-Record Evidence ("Response to Supplemental Evidence"), and (ii) Licensee's Motion to Dismiss the Appeal for Lack of Standing.

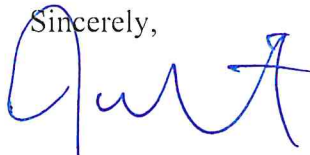

Please note that consistent with the Board's order and applicable rules, we have not included any electronic links to documents cited in the Response to Supplemental Evidence. All documents are either part of the licensing and appeal record in this matter or are available on either the Maine DEP's or CLF's websites, in which case copies of the referenced documents and/or screen shots of the webpages are attached as exhibits to the Response to Supplemental Evidence. WMDSM is not proposing the exhibits as evidence; rather the information is provided to demonstrate that the non-record evidence was available during the licensing proceeding and could have been introduced at that time.

WMDSM has also cited to regulations, statutes and cases and although they are not included as exhibits, we could provide copies if it would be helpful to do so.
