Marybeth Richardson, Hearing Officer  
Department of Environmental Protection  
312 Canco Road  
Portland, ME 04103

Hearing Officer Richardson:

Enclosed please find the Post-Hearing Brief and Proposed Findings of Fact and Order, submitted on behalf of the Maine Turnpike Authority (“MTA”).

Thank you for your time and consideration. Please do not hesitate to contact me with questions or concerns

Sincerely,

Joanna B. Tourangeau

STATE OF MAINE

 ) WATER QUALITY CERTIFICATION, AND  
 ) NOTICE OF INTENT UNDER THE  
 ) SITE LOCATION GENERAL PERMIT

**APPLICANT'S POST HEARING BRIEF**

Pursuant to Section 23 of Chapter 3 of the Maine Department of Environmental Protection's ("Department") rules, Applicant submits this post hearing brief and attached proposed findings of fact (*see Tab 1*).

**SUMMARY**

The record is clear. The Maine Turnpike Authority's ("MTA") notice of intent to obtain coverage under the State of Maine Department of Environmental Protection Site Location of Development Act General Permit for the Maine Turnpike Authority ("General Permit") and permit application under the Natural Resource Protection Act ("NRPA") meet each and all of the applicable permitting standards. The only evidence submitted by Intervenors focused on whether All Electronic Tolling ("AET") is a practicable alternative to the MTAs proposed Open Road Tolling ("ORT") plaza at Mile 8.8 (the "Project"). However, the record clearly establishes that AET does not meet the definition of practicable because AET is not feasible upon consideration of cost, existing alternative technology (ORT) and logistics given the overall purpose of the Project. Having established this, MTA has met its burden of proof and the record supports issuance of a NRPA approval and authorization under the General Permit.

## **BACKGROUND**

The MTA filed an application in October of 2016 for a new ORT plaza at mile 8.8 of the Maine Turnpike (“Turnpike”) in York, Maine and seeking a Natural Resources Protection Act permit pursuant to 38 M.R.S. §§480-A – 480-JJ and filing a Notice of Intent to Comply with the General Permit pursuant to the Site Location of Development Act, 38 M.R.S. §§ 481-90 (“MTA Application”). The Department accepted the MTA Application as complete on November 9, 2016. On December 2, 2016, the Department determined that a public hearing would be held on the MTA Application. Both the Town of York and Think Again submitted petitions to intervene that were granted by the Department without objection by the MTA.

Both intervenors presented a single argument in opposition to the MTA Application: that AET is a practicable alternative to ORT. Subsequently, the two intervenors were consolidated by the Department into one Intervenor. Accordingly, the Second Procedural Order specified that:

[t]he hearing will focus on the ...[NRPA]... permit application that was submitted by MTA to the Department. The hearing is not a forum for the discussion of all issues related to the MTA project, but is limited to the licensing criteria which are relevant to the NRPA permit application. [...] Testimony that is not related to the licensing criteria for MTA’s NRPA permit application will not be permitted.

Second Procedural Order at ¶ 13. Consistent with the motions to intervene and pre-filed testimony, Intervenor’s opposition at the public hearing Intervenor focused solely on the viability of AET as a practicable alternative to ORT under NRPA. There was no significant evidence or testimony submitted regarding other NRPA criteria or regarding any General Permit standards. As such, discussion herein is limited solely to that issue while the attached proposed findings of fact and conclusions of law addresses MTA compliance with the full universe of applicable approval standards.

## ANALYSIS

The Project has minimal impacts to the environment, the MTA has provided for compensation for those minimal impacts which vastly exceeds any applicable requirements, and MTA has demonstrated that AET is not a practicable alternative to ORT.

### **1. The MTA Application entails minimal impacts to the environment.**

Although there has been Project opposition within the Town of York, the record documents that careful design and siting in close collaboration with the United States Army Corps of Engineers (“ACOE”), the Maine Department of Inland Fisheries and Wildlife (“MDIFW”), and the Department has resulted in a Project that the ACOE found will have “only minimal individual or cumulative environmental impacts.” Letter from Frank Del Giudice of the ACOE to Sara Zografos of the MTA regarding File Number NAE-2007-01211 (attached hereto at Tab 2).

Natural resource impacts associated with the MTA Application include 1.46 acres of total wetland impact, consisting of primarily isolated forested wetlands along the fringe of the existing Turnpike. Of this total there are no direct impacts to significant vernal pools, 1.41 acres of impact to buffers of vernal pools, and 24 linear feet of perennial stream impacts. There are no impacts to any federally listed Threatened and Endangered species but there will be minor impacts, to 0.13 acres, of the habitat of two state Threatened and Endangered animal species: spotted turtle (*Clemmys guttata*) and eastern ribbon snake (*Thamnophis sauritus*).

### **2. The MTA has provided compensation for all impacts to the environment.**

The MTA volunteered a compensation package for these minimal impacts that vastly exceeds any applicable requirements. The MTA will be required to pay an In Lieu Fee of \$281,649.01 to the Department. The MTA also entered into a Memorandum of Agreement with the MDIFW and Maine Natural Areas Program whereby the MTA will fund wildlife passage at a nearby, MDIFW selected location, and implement a conservation easement on 22 acres of the Morrison parcel to protect a

significant vernal pool. Other use of this property, such as for residential development, will thereby be eliminated. Protection of this parcel from development allows for significant retention of wetland area, function and values and greatly exceeds any compensation requirements imposed under NRPA.

**3. AET is not a practicable alternative to ORT.**

The MTA has spent millions of dollars analyzing how and where to prudently implement highway speed tolling on the Turnpike. HNTB, a recognized national expert on tolling, first analyzed the issue. In response to concerns from the Town of York, the MTA hired another recognized expert – CDM Smith – to take a fresh look at the ORT vs. AET question . This fresh look resulted in CDM Smith’s 2014 report, a detailed MTA staff recommendation in favor of ORT, and, ultimately, the MTA Board decision to implement ORT at mile 8.8.

In 2015, the ACOE complimented the MTA on the “thoroughness” of its consideration of AET. Since that time, the MTA has produced even more information for its application and its pre-filed direct and rebuttal testimony for the hearing. The MTA and its consultants spent months assembling comprehensive documentation regarding its alternatives analysis with a specific focus on ORT versus AET. *See* MTA NRPA Application Sections 1.1 through 2.4 consisting of 55 pages and the 22 Appendices supporting these sections (Appendix 1A through Appendix 2L consisting of 384± pages).

After the Department granted the request for a public hearing, the MTA has spent many more staff weeks and tens of thousands of dollars more in direct consultant costs for CDM Smith, HNTB and Jacobs to prepare the hearing materials which readdressed the AET versus ORT question. These materials include 20 pages of direct pre-filed testimony and 26 supporting Exhibits. Further, the materials include 25 pages of pre-filed rebuttal testimony, and 4 more Exhibits. Most recently, the MTA engaged its experts to again provide updated information relevant to the AET practicability question.

In all, the MTA has submitted an estimated 600 pages of material to support its decision to utilize ORT at mile 8.8. All of this evidence is the kind of evidence upon which reasonable persons are

accustomed to rely in the conduct of the serious affair of tolling as required by the Maine Administrative Procedure Act, 5 MRSA §9057(2) (“reliable evidence”)<sup>1</sup>. The MTA decision selecting ORT at mile 8.8 as the best alternative was based on extensive reliable evidence from multiple expert firms. This decision was financially prudent, consistent with good tolling practice nationally, and was made by the entity with the experience, obligation and authority to make it.

In short, the MTA took seriously its obligation to consider the practicability of AET versus ORT. Practicability is defined at Chapter 310 of the Department’s Rules as:

[a]vailable and feasible considering cost, existing technology and logistics based on the overall purpose of the Project.

06-096 C.M.R. ch. 310 3(R). The MTA has demonstrated on the record that, given the Project purpose, AET is not a practicable alternative to ORT due to its inferior financial, logistical and technological characteristics.

i. **AET does not meet the Project purpose.**

By letter dated July 24, 2015, the ACOE determined<sup>2</sup> that the basic project purpose is:

To replace the existing barrier toll plaza on the Maine Turnpike at York, Maine with highway speed electronic tolling lanes and cash (non-EZ pass) lanes to address safety deficiencies, settling/subsidence, facility deficiencies including substandard tolling equipment, existing and projected traffic volumes, and traveler impacts and expectations (“Project Purpose”).

Appendix 1A to the MTA NRPA Application. AET does not meet this Project Purpose. AET excludes any cash (non-EZ pass) lanes. By definition, therefore, AET is not practicable because its exclusion of cash lanes places it outside the Project Purpose. Despite the clarity of this outcome, the MTA spent a decade considering the other aspects of AET versus ORT in order to

---

<sup>1</sup> With respect, the testimony of Jarvis, Smith and Sullivan represents their observations only, and is not reliable evidence to make tolling decisions.

<sup>2</sup> The ACOE may legitimately consider cost/economics in establishing a basic project purpose so long as the project purpose is not defined so narrowly as to make the alternatives analysis meaningless. *Sylvester v. U.S. Army Corps of Engineers*, 882 F.2d 407, 409 (9th Cir. 1989). Here, there can be no question but that the alternatives analysis was meaningful. While the MTA could have simply stopped consideration of AET upon concluding that it did not meet the Project Purpose, it did not do so. It continued with a fulsome alternatives analysis- including AET. This alternatives analysis, as discussed below, conclude that AET was not a practicable alternative to ORT independent of its failure to meet the Project Purpose and because of its significant cost and logistic constraints compared to ORT. Further, the MTA’s alternatives analysis considered a no build/reconstruction alternative and five ORT alternatives.

satisfy its Board, those with a financial and policy interest in MTA operations, and the general public that the decision to implement ORT was thorough, complete and well considered.

ii. **AET is not a practicable alternative given its significant costs in comparison to ORT.**

The costs associated with ORT are solely the capital costs associated with construction of a new toll plaza at mile 8.8- approximately 40 million dollars. Notably, the alternatives analysis revealed that the costs of renovating the current toll plaza significantly exceed the costs of a new ORT toll plaza. Consequently, selection of the ORT plaza at mile 8.8 has the benefit of avoiding those additional renovation costs. ORT presents no other financial risks- no toll increases, no impacts to bonding, no job eliminations. In fact, ORT is expected to increase traffic volumes on the Turnpike, thereby increasing toll revenues. The CDM Smith Report estimates that ORT will increase revenue – without toll increases – by about \$1 million in year one. Turnpike Exhibit B at 22 (“Because the \$0.00 surcharge had a substantial positive impact on net toll revenue [...for ORT...], the forecasts for the greater than \$0.00 surcharges [...for ORT...] were not included in this report.” “If ORT is implemented, total toll transactions are estimated to increase by 19,000 compared to the existing condition.”).

In order to thoroughly understand the financial characteristics of AET versus ORT, the MTA worked with CDM Smith in 2014 to complete a model which updated a study completed by HNTB in 2009. The CDM Smith model was designed to predict, based on 2013 data, what toll increase would be required in order to achieve financial parity between AET and ORT over a ten year period given the greater capital costs associated with ORT. Turnpike Exhibit B at 46. Even with certain model biases in favor of AET, AET came closest to financial parity with ORT only when the toll at York was doubled. *Id.* Intervenor argued in pre-filed testimony and at the public hearing that if one moves the starting line of the model forward to 2019 or if one updates the model, that the amount of the toll increase might decrease. Hearing Transcript at 100-101 (Attorney Anderson cross examination of

Quinlin regarding decreasing surcharge over time.) However, the model shows that AET would require a toll increase in order to be comparable to ORT – the only argument Intervenor presents is the amount of that toll increase. *Id.* In short, what the model demonstrates is that the additional capital costs associated with ORT could be amortized over ten years (instead of the usual thirty) without any toll increase while implementation of AET would require a toll increase. Turnpike Exhibit B at ES-3. The need to increase tolls upon implementation of AET is driven by the uncollectability of cash transactions. ORT does not have this problem- it includes cash lanes.

The need to increase tolls upon implementation of AET has broad consequences to the MTA. MTA revenue is pledged- meaning that potential losses of cash revenue would trigger an obligation to disclose, the need to redesign the toll system to allow for proper billing of customers based on their entry and departure points, a new traffic and revenue analysis, a downgrade of the MTA bond rating, higher future borrowing costs, and possibly a scaling back of capital projects in the MTA’s 30-year plan. MTA NRPA Application 1.15-1.16; Pre-filed Testimony of Douglas Davidson at 4-5; Hearing Transcript at 90-91 (Lavallee discussing AET financial impacts). Implementation of ORT entails none of these costs.

iii. **AET is not a practicable alternative to ORT given its greater logistic challenges.**

ORT at York will integrate seamlessly with existing technology at all existing tolls on the Turnpike and will result in increased traffic on the Turnpike. Implementation of AET, on the other hand, would require redesign of the entire MTA toll plaza network and toll collection mechanisms and would divert traffic away from the Turnpike. The additional logistical challenges associated with AET make it impracticable in comparison to ORT.

As Mr. Lavallee documented in detail in his Pre-Filed Rebuttal Testimony, even a much smaller toll increase of \$1.00 resulted in significant diversion of traffic from the toll highway in New Hampshire.

*See* Lavallee Pre-Filed Rebuttal Testimony at 7-23(4). There is no dispute on the record that implementation of AET will cause diversion of traffic from the Turnpike to other routes. *See* Hearing Transcript at 216-17 (Sullivan Testimony that increased tolling would result in diversion of traffic from the Turnpike to adjacent roads). There is also no dispute on the record that, as Executive Director Mills testified at the public hearing, the MTA has observed diversion of traffic from adjacent roads to the Turnpike at locations where it has already implemented ORT. *See* Hearing Transcript at 20-21 (Mills Testimony that ORT brings traffic to Turnpike).

ORT technology integrates with both the existing barrier plazas and other ORT plazas on the Turnpike. ORT technology has the added benefit that its core highway speed lanes utilize the exact same technology as AET- meaning that, in the future, should it become practicable to implement AET, the MTA could do so without having to do anything but change signage and terminate or modify operation of the side cash lanes. Hearing Transcript at 61 (Mills testimony that AET and ORT technology is identical except that ORT adds cash lanes on the side). AET, on the other hand, would not allow the MTA to seamlessly account for violators versus non-payment events or tolling differentials based on point of entry and departure. *See* Pre-filed Testimony of Douglas Davidson at 2-5; Hearing Transcript at 19 (Mills testimony regarding proliferation of billing errors with AET); 182-85 (Davidson testimony regarding reconciliation of errors, tracking violators and inability to match trips with AET unless entire Turnpike is converted to AET). Further, implementation of AET would require transition of the current cash tolling system to a toll by mail system including reconfiguration of the entire back office operation of the MTA.

## CONCLUSION

The MTA carefully, deliberately, and extensively considered AET and ORT. AET does not meet the Project Purpose. AET requires a toll increase and entails other financial risks which significantly impact the MTA's financial condition. AET at York would not integrate seamlessly with

ORT and barrier plazas which currently exist on the Turnpike or with the current toll collection mechanisms for the Turnpike and would divert traffic from the Turnpike making it logically inferior to AET. As such, the record supports the conclusion that AET is not a practicable alternative to ORT. Given that this is the sole issue raised by Intervenor and addressed at the public hearing, the record supports the Department conclusion that the Project meets all applicable Department permitting standards and that the General Permit and NRPA permits should issue.

Sara Zografos  
Maine Turnpike Authority  
2360 Congress Street  
Portland, Maine 04102

Dear Ms. Zografos:

We have reviewed your application to fill approximately 58,086 s.f. of freshwater wetlands adjacent to the Maine Turnpike at York, Maine in order to construct a replacement for the existing deteriorated and deficient York Toll Plaza.

Based on the information you have provided, we have determined that the proposed activity, which includes a discharge of dredged or fill material into waters of the United States, including wetlands, will have only minimal individual or cumulative environmental impacts. Furthermore, we have determined that the proposed replacement facility represents the least environmentally damaging practicable alternative. Therefore, this work is authorized as a Category 2 activity under the enclosed Federal permit known as the Maine General Permit (GP). This work must be performed in accordance with the terms and conditions of the GP and also in compliance with any additional special condition(s).

You are responsible for complying with all of the GP's requirements. Please review the enclosed GP carefully, in particular the GP conditions beginning on Page 5, to familiarize yourself with its contents. You should ensure that whoever does the work fully understands the requirements and that a copy of the GP and this authorization letter are at the project site throughout the time the work is underway.

This authorization does not obviate the need to obtain other Federal, state, or local authorizations required by law, as listed on Page 3 of the GP. Performing work not specifically authorized by this determination or failing to comply with any special condition(s) provided above or all the terms and conditions of the GP may subject you to the enforcement provisions of our regulations.

This authorization becomes valid only after the Maine Department of Environmental Protection (DEP) issues or waives Water Quality Certification (WQC) as required under Section 401 of the Clean Water Act. In the event the DEP denies the 401 WQC, this determination becomes null and void. The address of the DEP regional office for your area is provided on Appendix D of the attached GP.

This authorization presumes that the work as described above and as shown on your plans noted is in waters of the U.S. Should you desire to appeal our jurisdiction, please submit a request for an approved jurisdictional determination in writing to this office.

This authorization expires on October 13, 2020. You must commence or have under contract to commence the work authorized herein by October 13, 2020 and complete the work by October 13, 2021. If you do not, you must contact this office to determine the need for further authorization before beginning or continuing the activity. We recommend you contact us *before* this permit expires to discuss a time extension or permit reissuance.

You must contact us immediately to discuss modification of this authorization if you change the plans or construction methods for work within our jurisdiction. This office must approve any changes before you undertake them.

We continually strive to improve our customer service. In order for us to better serve you, we would appreciate your completing our Customer Service Survey located at [http://corpsmapu.usace.army.mil/cm\\_apex/f?p=regulatory\\_survey](http://corpsmapu.usace.army.mil/cm_apex/f?p=regulatory_survey).

Please contact Jay Clement, of my staff, at our Manchester, Maine Project Office at (207) 623-8367 if you have any questions.

Sincerely,

  
Frank Del Giudice  
Chief, Permits & Enforcement Branch

STATE ID# NRPA

**DESCRIPTION OF WORK:**

Fill approximately 58,086 s.f. of freshwater wetlands adjacent to the Maine Turnpike, in the vicinity of Mile 8.8, at York, Maine in order to construct a replacement for the existing deteriorated and deficient York Toll Plaza. This work is shown on the attached plans entitled "PROJECT LOCATION MAP OF SOUTHERN MAINE TOLL PLAZA" in one sheet dated "3/18/2016", "YORK TOLL PLAZA" in two sheets dated "06/17/16", "YORK TOLL PLAZA" in 16 sheets revised "01/11/17", and "I-95 CROSS SECTIONS" in 38 sheets dated "08/16".

LAT/LONG COORDINATES : 43 179284° N -70.649289° W USGS QUAD: YORK HARBOR, ME

**I. CORPS DETERMINATION:**

Based on our review of the information you provided, we have determined that your project will have only minimal individual and cumulative impacts on waters and wetlands of the United States. Your work is therefore authorized by the U.S. Army Corps of Engineers under the enclosed Federal Permit, the Maine General Permit (GP). Accordingly, we do not plan to take any further action on this project.

You must perform the activity authorized herein in compliance with all the terms and conditions of the GP [including any attached Additional Conditions and any conditions placed on the State 401 Water Quality Certification including any required mitigation]. Please review the enclosed GP carefully, including the GP conditions beginning on page 5, to familiarize yourself with its contents. You are responsible for complying with all of the GP requirements; therefore you should be certain that whoever does the work fully understands all of the conditions. You may wish to discuss the conditions of this authorization with your contractor to ensure the contractor can accomplish the work in a manner that conforms to all requirements.

If you change the plans or construction methods for work within our jurisdiction, please contact us immediately to discuss modification of this authorization. This office must approve any changes before you undertake them.

Condition 37 of the GP (page 16) provides one year for completion of work that has commenced or is under contract to commence prior to the expiration of the GP on October 12, 2020. You will need to apply for reauthorization for any work within Corps jurisdiction that is not completed by October 12, 2021.

This authorization presumes the work shown on your plans noted above is in waters of the U.S. Should you desire to appeal our jurisdiction, please submit a request for an approved jurisdictional determination in writing to the undersigned.

No work may be started unless and until all other required local, State and Federal licenses and permits have been obtained. This includes but is not limited to a Flood Hazard Development Permit issued by the town if necessary.

**PLEASE NOTE THE FOLLOWING GENERAL CONDITIONS FOR  
DEPARTMENT OF THE ARMY  
GENERAL PERMIT  
NO. NAE-2007-01211**

1. This authorization requires you to 1) notify us before beginning work so we may inspect the project, and 2) submit a Compliance Certification Form. You must complete and return the enclosed Work Start Notification Form(s) to this office at least two weeks before the anticipated starting date. You must complete and return the enclosed Compliance Certification Form within one month following the completion of the authorized work and any required mitigation (but not mitigation monitoring, which requires separate submittals).
2. The permittee shall assure that a copy of this permit is at the work site whenever work is being performed and that all personnel performing work at the site of the work authorized by this permit are fully aware of the terms and conditions of the permit. This permit, including its drawings and any appendices and other attachments, shall be made a part of any and all contracts and sub-contracts for work which affects areas of Corps of Engineers' jurisdiction at the site of the work authorized by this permit. This shall be done by including the entire permit in the specifications for the work. If the permit is issued after construction specifications but before receipt of bids or quotes, the entire permit shall be included as an addendum to the specifications. The term "entire permit" includes permit amendments. Although the permittee may assign various aspects of the work to different contractors or sub-contractors, all contractors and sub-contractors shall be obligated by contract to comply with all environmental protection provisions of the entire permit, and no contract or sub-contract shall require or allow unauthorized work in areas of Corps of Engineers jurisdiction.
3. Adequate sedimentation and erosion control devices, such as geotextile silt fences or other devices capable of filtering the fines involved, shall be installed and properly maintained to minimize impacts during construction. These devices must be removed upon completion of work and stabilization of disturbed areas. The sediment collected by these devices must also be removed and placed upland, in a manner that will prevent its later erosion and transport to a waterway or wetland.
4. All exposed soils resulting from the construction will be promptly seeded and mulched in order to achieve vegetative stabilization.
5. Mitigation shall consist of payment of \$281,649.01 to the Natural Resource Mitigation Fund. The completed ILF Project Data Worksheet which must be mailed with a cashiers check or bank draft, made out to "Treasurer, State of Maine", with the permit number noted on the check. The check and worksheet should be mailed to: ME DEP, Attn: ILF Program Administrator, State House Station 17, Augusta, ME 04333. **This authorization is not valid until the permittee provides the Corps with a copy of the check, with the permit number noted on the check.** The ILF amount is only valid for a period of one year from the date on the authorization letter. After that time, the project would need to be reevaluated and a new amount determined.

# IN-LIEU-FEE (ILF) PROJECT DATA WORKSHEET

DEP Invoice # \_\_\_\_\_

[Note: Will be filled in by ILF Administrator at DEP]

Project name: Maine Turnpike Authority; York Toll Plaza Replacement

Applicant (s): Maine Turnpike Authority

DEP Permit #: L-27241-TG-A-N

Corps Permit #: NAE-2007-01211

ILF Contribution Amount \$281,649.01

[Note: Please attach a copy of the check]

Project address: Maine Turnpike; York, Maine

Biophysical region: Southern Maine; Gulf of Maine Coastal Lowland Subsection

Size of total impact subject to compensation: 58,086 s.f. (1.33 acres)

Resources Impacted: Refer to attached table

DEP Project manager: Green

Corps Project manager: Clement

## Corps ILF Processing Procedure:

Within 3 days of final permit approval the Corps project manager MUST send via e-mail to the ILF Administrator at DEP with the following attachments:

1. A Microsoft word version of this completed ILF project worksheet including the resource impact table. Please make sure that you double check the information to make sure that the worksheet is accurate and reflects the actual impacts that are stated in the permit and the correct biophysical region.

[Note: The DEP Invoice # section of the worksheet should be left blank and will be filled in by the ILF Program Administrator.]

2. A copy of a location map for the project site. The map MUST be made in GIS and saved as a pdf and MUST include a call out box to physically locate the project site and enough reference information so that project site can be geo-located on the MNRCP GIS data layer.
3. A pdf copy of the Corps permit for the project.

Corps permittees MUST be instructed to send all required ILF payments to the attention of the ILF Administrator Maine Department of Environmental Protection, State House Station 17, Augusta, Maine 04333. All checks must have the ILF program routing # 014.06A.1776.14 on the memo line.

## **Resource(s) Impacted:**

**Resource Type:** (Wetlands by NWI Type (PFO, PSS, M1, M2, E1, E2, etc), significant vernal pool (SVP), shorebird feeding & staging habitat (Shorebird), inland waterfowl & wading bird habitat (IWWH), tidal waterfowl & wading habitat (TWWH), and river, stream, or brook (RSB).

**Wetland Functions & Values:** Groundwater recharge/discharge (GWR); floodflow alterations(FF); fish & shellfish habitat(FSH); sediment toxicant retention (STR); nutrient removal (NR); production export (PE); sediment/shoreline stabilization (SS); wildlife habitat (WH); recreation (R); education/scientific value (ESV); uniqueness/heritage (UH); and visual quality/aesthetics (VQ).

**Types of impacts:** may include filling, dredging, vegetation conversion (e.g. forested to shrub/scrub), others.

<b>Resource type</b> (list all that apply)	<b>Functions (for wetland impacts)</b> (list all that apply, by resource type)	<b>Type of Impact</b> (by resource type)	<b>Sq Feet Impacted</b> (by resource type)
PFO1	WH, FF, STR, NR, GWR	Filling	54,022
PFO/SVP	WH, FF, STR, NR, GWR, PE	Filling	4,064
<b>Total square feet impacted</b>			58,086

## Corps ILF Processing Procedure:

Within 3 days of final permit approval the Corps project manager MUST send via e-mail to the ILF Administrator at DEP with the following attachments:

1. A Microsoft word version of this completed ILF project worksheet including the resource impact table. Please make sure that you double check the information to make sure that the worksheet is accurate and reflects the actual impacts that are stated in the permit and the correct biophysical region.

*[Note: The DEP Invoice # section of the worksheet should be left blank and will be filled in by the ILF Program Administrator.]*

2. A copy of a location map for the project site. The map MUST be made in GIS and saved as a pdf and MUST include a call out box to physically locate the project site and enough reference information so that project site can be geo-located on the MNRCP GIS data layer.
3. A pdf copy of the Corps permit for the project.

Corps permittees MUST be instructed to send all required ILF payments to the attention of the ILF Administrator Maine Department of Environmental Protection, State House Station 17, Augusta, Maine 04333. All checks must have the ILF program routing # 014.06A.1776.14 on the memo line.

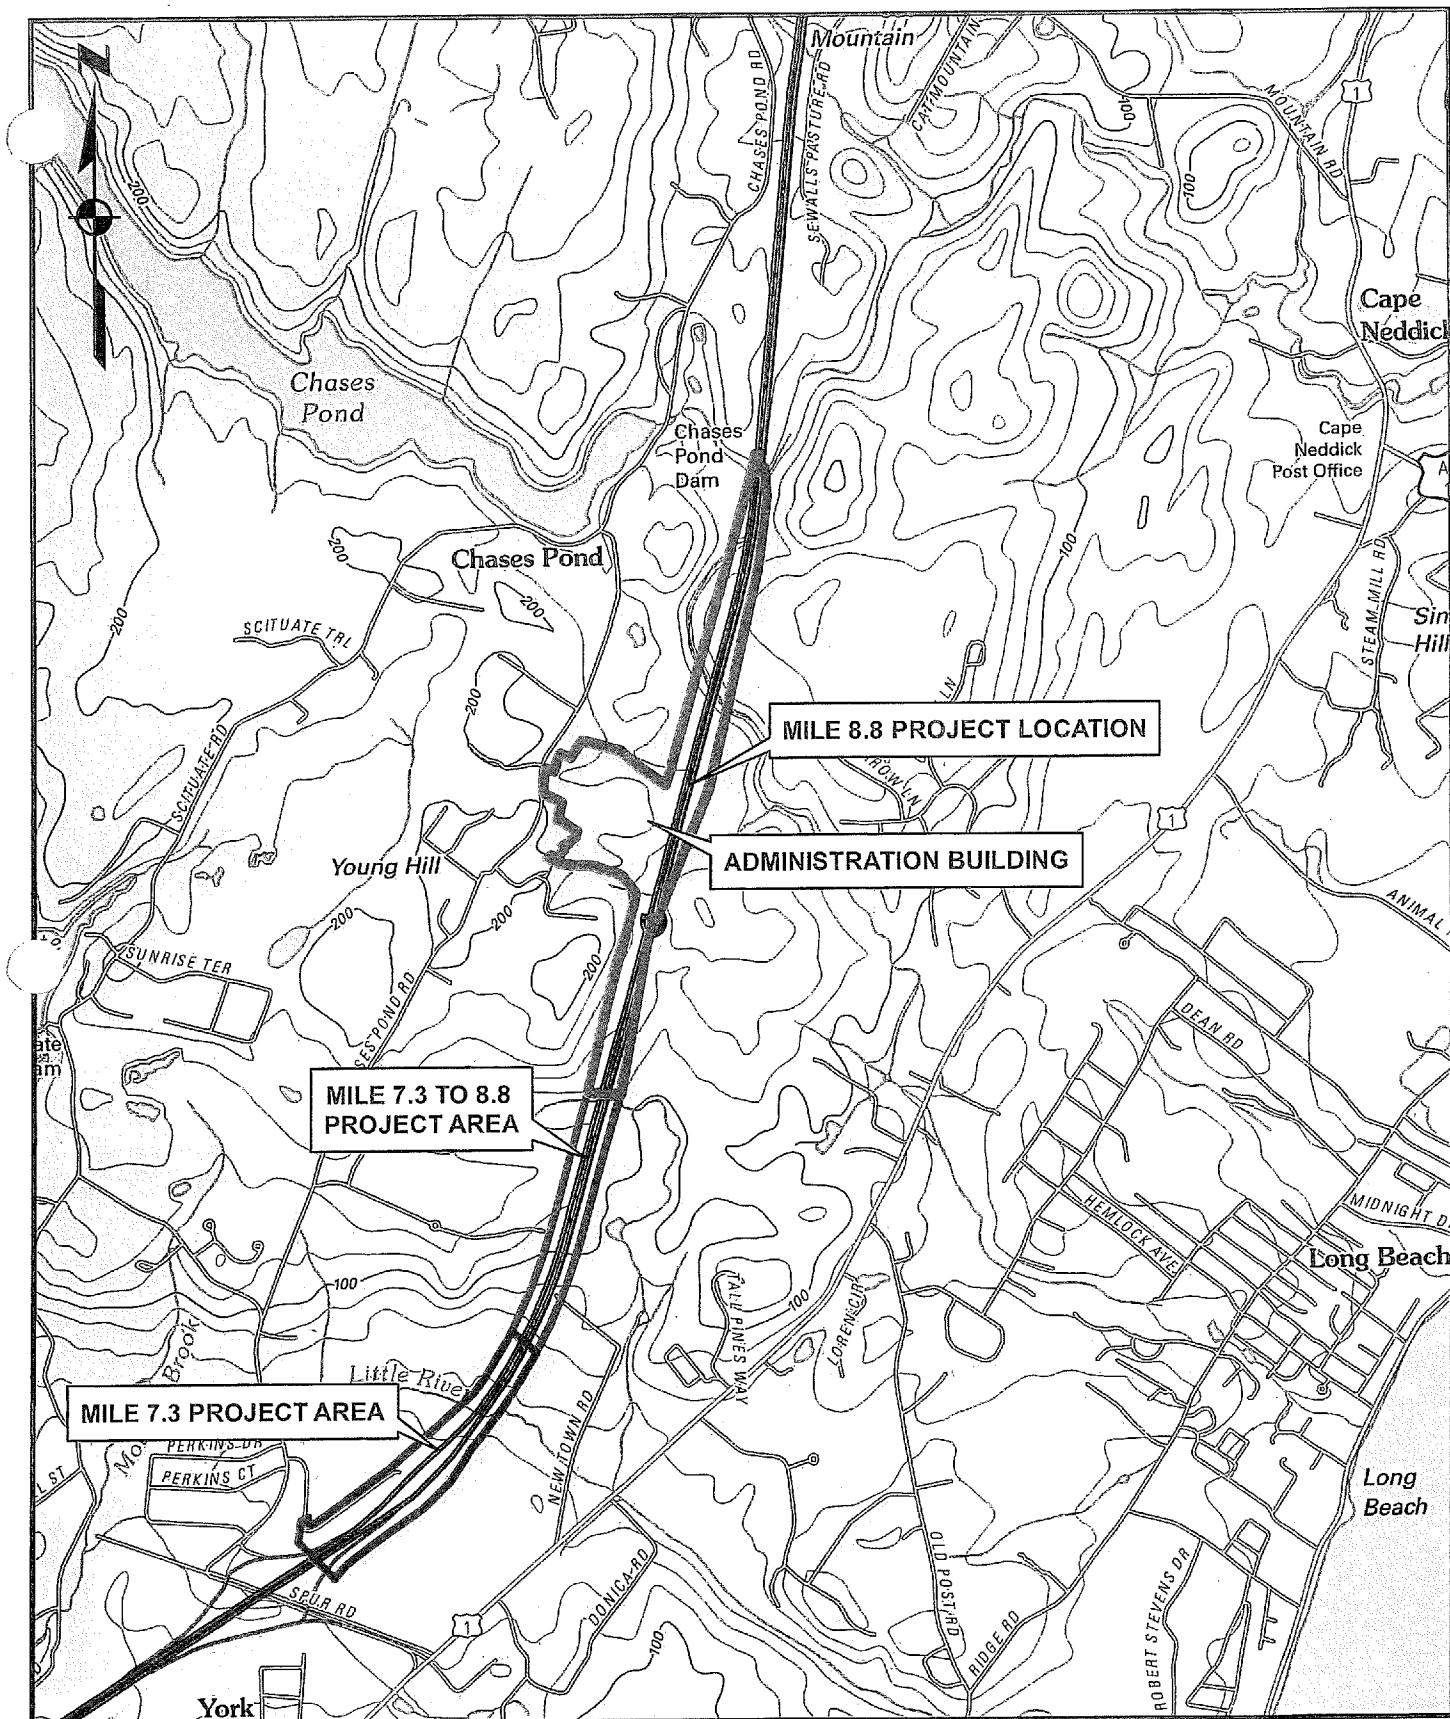

## **Resource(s) Impacted:**

**Resource Type:** (Wetlands by NWI Type (PFO, PSS, M1, M2, E1, E2, etc), significant vernal pool (SVP), shorebird feeding & staging habitat (Shorebird), inland waterfowl & wading bird habitat (IWWH), tidal waterfowl & wading habitat (TWWH), and river, stream, or brook (RSB)).

**Wetland Functions & Values:** Groundwater recharge/discharge (GWR); floodflow alterations(FF); fish & shellfish habitat(FSH); sediment toxicant retention (STR); nutrient removal (NR); production export (PE); sediment/shoreline stabilization (SS); wildlife habitat (WH); recreation (R); education/scientific value (ESV); uniqueness/heritage (UH); and visual quality/aesthetics (VQ).

**Types of impacts:** may include filling, dredging, vegetation conversion (e.g. forested to shrub/scrub), others.

<b>Resource type (list all that apply)</b>	<b>Functions (for wetland impacts) (list all that apply, by resource type)</b>	<b>Type of Impact (by resource type)</b>	<b>Sq Feet Impacted (by resource type)</b>
PFO1	WH, FF, STR, NR, GWR	Filling	54,022
PFO/SVP	WH, FF, STR, NR, GWR, PE	Filling	4,064
<b>Total square feet impacted</b>			58,086

**US Army Corps  
of Engineers®**  
New England District

(Minimum Notice: Permittee must sign and return notification  
within one month of the completion of work.)

## COMPLIANCE CERTIFICATION FORM

**Permit Number:** NAE-2007-01211

**Project Manager** Clement

**Name of Permittee:** Maine Turnpike Authority

**Permit Issuance Date:** \_\_\_\_\_

Please sign this certification and return it to the following address upon completion of the activity and any mitigation required by the permit. You must submit this after the mitigation is complete, but not the mitigation monitoring, which requires separate submittals.

\*\*\*\*\*  
\* MAIL TO: U.S. Army Corps of Engineers, New England District \*  
\* Permits and Enforcement Branch C \*  
\* Regulatory Division \*  
\* 696 Virginia Road \*  
\* Concord, Massachusetts 01742-2751 \*  
\*\*\*\*\*

Please note that your permitted activity is subject to a compliance inspection by an U.S. Army Corps of Engineers representative. If you fail to comply with this permit you are subject to permit suspension, modification, or revocation.

**I hereby certify that the work authorized by the above referenced permit was completed in accordance with the terms and conditions of the above referenced permit, and any required mitigation was completed in accordance with the permit conditions.**

Corps of Engineers Permit No. NAE-2007-01211 was issued to the Maine Turnpike Authority on . This work is located in wetlands adjacent to the Maine Turnpike, in the vicinity of Mile 8.8, at York, Maine. The permit authorized the permittee to fill approximately 58,086 s.f. of freshwater wetlands in order to construct a replacement for the existing deteriorated and deficient York Toll Plaza.

The people (e.g., contractor) listed below will do the work, and they understand the permit's conditions and limitations.
