Despite the overwhelming support by Maine voters to suspend the permits for CMPs cutting, the forest destruction continues. It is such a farce and looks bad for a democratic society to ignore the will of the majority, especially when the action that is being permitted may have significant and damaging and even permanent impacts across multiple habitats and species.

In this time when efforts to support cleaner power are focused on solar, tidal and wind, all of which Maine has in abundance, we should not be permitting power produced by using mega dams that violate indigenous tribal rights and flood sensitive habitats.

Please force CMP to cease and desist all cutting and clearing!
