Hi Dawn

I don't know who is handling the CMP license issue, but for some reason this guy thinks it's my alter ego, "Erie." Can you pass it along please?

Thanks

Dear Erie, I would like to draw your attention to the C.M.P. proposed power line corridor situation. I reside in Maine am a registered voter and indeed voted on the recent corridor referendum. The referendum vote was decided by the people of Maine. We were asked to decide and we did. the outcome of our united vote was not to allow CMP to continue with this project. We were asked and decided so in good faith and indeed by law you should not allow this program to continue to completion. Voting in the USA has been strongly questioned in the passed couple of years. Does the voting population decisions carry any weight or are we just waisting our time and effort. Do you realize ignoring the voice of the people can have huge negative repercussions on the American political system. We voted and said stop the program, so stop it, you have legally no personal choice in the matter. CMP's European owner and Hydro Quebec must be made to understand they will not be making more profits because of a corridor through Maine. As you should understand the environment will not be harmed when this proposal is stopped. If this proposal succeeded Hydro Quebec would have incentive to build more Hydro Electric Dams on the St Lawrance River. As you must know the neat from Hydro Electric Dams increase the temperature of the generating water force. This in turn radically effects waters entering the Casco Bay waters thus effecting our environment. Observe Russers Hydro Power system for evidence of this effect on the environment. But mostly listen to the voice of the people. This is America, For the people by the people that is our Foundation and not listen to European and Canadian for profit corporations. It's not what you think it's what mainers want in this situation. Thank you for your time.

Roy Peppiatt
Maine Voter by legal right
