Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

Mr. Beyer:

I am writing to ask the Department of Environmental Protection to deny the Spanish conglomerate Iberdrola, through their entities Avangrid and Central Maine Power, their desire to slash a fifty-three-mile-long corridor through some of Maine's most beautiful and environmentally sensitive woodlands.

Of course, you are aware that groups such as Trout Unlimited, the Natural Resources Council of Maine, and the Appalachian Mountain Club stand firmly against this profiteering gambit thinly veiled as "environmentally friendly" to Maine and Massachusetts. Their research has proven what any citizen with common sense has known from the start: It is unnecessary, and a bad deal for Maine's environment and economy.

There are dozens of strong arguments in favor of protecting our environment and livelihoods by denying CMP's permit application. Those aside, the recent Covid-19 pandemic should bring into sharp focus the danger of increasing our reliance on foreigners for our most vital commodities, and the so called "Clean Energy Connect" would do just that. We may consider the Spanish directors of Iberdrola, their Qatari financial backers, and the Canadians as our allies and business partners today, but in times of turmoil we must understand that they will do what benefits them first and foremost.

Let's leave a legacy of common sense, a protected environment, and independence for future generations by denying the profit-grabbing, environment damaging, co-dependent relationship proposed by those in foreign countries. Please stand for Maine's environment and her hard-working citizens by reconsidering this permit.

Thank you.

Regards,  
Gary Henry

Dear Maine DEP Jim Beyer,

CMP's "Clean Energy Corridor" project would do incalculable damage to the ecosystems it passes through, destroying and fragmenting the habitats of the many different fish, birds, mammals, and plants that reside in those regions of forest that would be disrupted by the construction. Some of these animals live only in the regions that would be affected, which represent the largest unbroken woodlands in the state. There is absolutely nothing "clean" about a project that promises such large-scale environmental degradation.

Please recognize that the forest and its wildlife are worth more than any amount of money CMP could ever pay out. In destroying what remains of Maine's wild nature, we destroy Maine. What we ruin is ruined; there is no turning back. Please do not issue CMP the permit it has requested.

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy. This project is to benefit 2 foreign companies and not Maine. Profit is the reason, not clean low cost power for Maine! The power is for Massachusetts not for us! This reminds me of Maine Yankee, clean low cost power for Maine, jobs, tax revenue etc. etc. The power went out of state, electric prices did not go down, and we now have a nuclear waste dump in Maine. (What a great deal for Maine Right!)

Two other states turned this project down! Maine should to! Cutting a new power corridor through our wilderness and widening the existing, when Maine does not need it, or get any forever benefit from it is wrong. CMP (Iberdrola Spain) and Canada will have use of this grid corridor forever once it is open! We get a set amount for 20 years for programs, electric rebate, car charging stations, etc. This is a drop in a bucket in the long run, and these programs support the use their power! What a win for the people of Maine (What A Joke)! The winner, two foreign companies forever, their massive profits, and Mainers and Our environment get screwed again! This forever right-of-way through our State should have a major benefit to the people of the State of Maine forever or it should not even be considered!!!

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

Dear DEP Jim Beyer

As a long time Mainer (47 years ) I have seen the landscape change a lot. The idea of chopping a swath thru our Maine woods, so an offshore company can make millions of dollars is just wrong.

The value of our unspoiled land doesn't have a price. People come to Maine just to see the pristine landscape that we have to offer, let alone countless other activities . You don't know what you have ,until its gone.

This corridor has been tried in at least two other states and they were smart enough to stop the project there . Just like the big wind has had there way with Maine because its an easy target. We get rolled over by BIG corporate money who can grease the skids where ever needed.

Stand up for Mainers and send these guys packing , its the right thing to do and your grand kids will thank you. Letting this go thru is a disservice to the Maine citizens.

Thanks in advance

Steve Hassett

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Regards,  
David Tompkins

Dear Maine DEP Jim Beyer,

Please consider my request that CMP shouldn't get a permit to build the corridor. This would have detrimental effects on Maine and is a bad deal for Maine's environment and economy.

A number of environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment. We are counting on you.

Dear Maine DEP Jim Beyer,

This is a terrible terrible idea. The destruction of our natural resources, of the natural beauty of Maine, for the sake of corporate greed is a disgrace. Many other states went down this road many decades ago and now they are concrete wastelands. It is a slippery slope that will lead us all to further damage our environment.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Please reconsider this permit and stand up for Maine's environment.

Once this pristine land is disturbed, we can never get it back. Our state needs to preserve its wild places for posterity as well as for our tourist industry. We rely on our tourist industry and should give tourists a reason to come. Please do the right thing!!

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Enough signed petitions to put this issue on the ballot were delivered to Augusta in plenty of time for this to be a November referendum item, but apparently the will of the people is being deliberately ignored. This destruction of the state of Maine should be decided by the citizenship and not by greedy bureaucrats.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Having been born and raised in this state and having a family camp on First Roach Pond since 1968, the beautiful forests and waters of this state are part of my blood and the thought of this corridor destroying so much of them for out of state and out of country concerns pains me to the core.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

Very few things raise my ire to the level of passion. CMP putting a corridor through the wild, western woods of Maine does. PLEASE do not allow this. I don't know one person who loves this idea! Shouldn't the people of Maine be behind such an endeavor? We are not! The townspeople who live there as well as those like me who live in Portland and even as far away as Aroostook - we stand together and oppose this with all of our hearts. The paltry, temporary, economic gain is not worth the destruction of the wilderness, of which we are all so proud! PLEASE PROTECT MAINE. PLEASE STAND WITH US AND NOT WITH CMP!

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

There is no logical reason why an out-of-country company should be able to do whatever they please to our state. New Hampshire and Vermont have already turned their unworthy plan down and now Maine should do the same. We are not here to make them even richer than they are. They should be investing in off-shore wind power or tidal power. Or how about solar power. Gee.....what an idea. Everybody's doing it, and they should too if they need more power. Here's another idea for them. Make low payment loans available to individuals and towns who want to build solar arrays.

Thank you for reading this and I'm thanking you in advance for turning down their permit application.

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

**EXTERNAL: This email originated from outside of the State of Maine Mail System. Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Dear Maine DEP Jim Beyer,

It is hard to believe you are considering allowing this permit when you know (you must!) how the people of Maine feel about this project!

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy. The information is out there. I don't understand how our decision makers are not using it.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment. Deny CMP's permit for the corridor. It should at least be denied till after the people have weighed in with their votes in November.

**Subject:** Please don't approve the CMP corridor permit

**EXTERNAL: This email originated from outside of the State of Maine Mail System. Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Dear Maine DEP Jim Beyer,

CMP should not get a permit to build the corridor. It will have terrible repercussions for Maine's environment (please note the already devastating decline in songbirds); and while forests become increasingly important for the slowing of climate change, it would be reprehensible to decimate one of the last and largest stands of contiguous forest in the northeast.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree, as do the majority of towns along the corridor.

Please reconsider this permit and stand up for the longterm future of Maine's environment and wildlife.

Dear Maine DEP Jim Beyer,

I am writing to respectfully ask that you deny CMP's corridor permit. The power being transmitted is being produced at the cost of huge amounts of once natural waterway. The power being transmitted will not serve Maine. As an efficiency expert, instead of increasing big business profits, lets strive for real change by being more efficient with power usage, utilize net metering and be creative and innovative with power usage.

My family owns a home, camp and recreate all along the projected corridor route. We don't want CMP's corridor to be an embarrassing lasting symbol of short sighted greed for generations to come. Maine is just too good for that.

Sincerely, Len Adams-New Sharon

**Subject:** Please don't approve the CMP corridor permit

**EXTERNAL: This email originated from outside of the State of Maine Mail System. Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Dear Maine DEP Jim Beyer,

CMP should not be given a permit to build the corridor because it's a bad deal for Maine's environment and economy. It has not been definitely determined that the project will generate new environmentally sourced energy; rather it seems it will simply reroute what is currently being produced, at a huge cost to Maine's environment.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

This permit should not be issued. Please stand up for Maine's environment and deny it.

Dear Maine DEP Jim Beyer,

CMP should not get a permit to build the corridor. This deal is not in the best interest of Maine's environment and economy. Furthermore, CMP is not a true Maine company, nor does it have a history of supporting Maine residents in times of need. In fact, it has done the opposite by refusing to accept responsibility when their internal errors cost huge sums for Maine residents who already suffer with limited resources. Why are we giving them an opportunity to do it again?

Especially now, in a time of global crisis, we should not be continuing to give opportunities to companies that have no intention of supporting our immediate community. The corridor should not happen now, nor should it ever happen by the hands of CMP.

From necessity comes invention. I have confidence that we can create more green jobs in the future with better values and practices in place than this current proposal from CMP. We must push to create green energy within our nation for our nation, not funnel it from other countries as a temporary fix at the expense of our beautiful environment and way of life.

Please reconsider this permit and stand up for Maine's environment and people.

**EXTERNAL: This email originated from outside of the State of Maine Mail System. Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Dear Maine DEP Jim Beyer,

Please hear us-- Maine citizens overwhelmingly, at public meetings and in correspondence have expressed their opinion that this CMP deal is not in Maine's interest.

The corridor that CMP is building will be a series of fee lands and easements that will be ripe for pipelines or what-have-you. We don't want this incursion to our forests. Let Massachusetts settle it's own energy demands. let Hydro-Quebec settle it's own bad business choices. If it's your home territory that was being dammed and submerged, you'd see how hydro is not "green" energy at all-- Maine successfully rewarded the Penobscot River, and our fisheries are rebounding. So is recreation.

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

1 geo thermal isn't exactly green/clean, and if it were we could be plugging up our own rivers.

2 corridors take a lot of chemicals to maintain.

3 Maine does not receive enough compensation for playing middle man.

**EXTERNAL: This email originated from outside of the State of Maine Mail System. Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Dear Maine DEP Jim Beyer,

CMP should NOT get a permit to build the corridor because it's a bad deal for Maine's environment, economy and, public health, as Maine and the world are under the shadow of death and sickness we are unprepared for. Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree to not grant this permit.

In this terrible, unprecedented and uncertain time of the coronavirus pandemic, it is reckless -- and arguably, a death sentence -- to continue the dated practices of raping and further disturbing our wildlands, wildlife woods and waters. We MUST NOT destroy one more precious shrub, insect, animal or wooded area, when science has confirmed this COVID-19 pandemic is due to cumulative horrific human activity against wildlife and destruction of habitats around the world. Last May, the UN warned we must make a seismic shift in thinking and practices about wildlife and lands, and aggressively work to protect, preserve and restore our natural world NOW. Is COVID-19 the seismic shift we must learn from? Humans and corporations have so recklessly annihilated the earth's wildlife and habitats --the very foundation of life for ALL -- and now are causing thousands of deaths, sickness and global destabilization.

I urge you: Do NOT issue this permit. Stand up for Maine's environment, animals and human health.

**Subject:** Please don't approve the CMP corridor permit

**EXTERNAL: This email originated from outside of the State of Maine Mail System. Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Since we are in the grip of a very unpredictable virus, I also suggest, encourage, insist that you give an additional 30 days for Mainers to comment beyond the March 27 deadline.

Thank you, wash your hands and stay well!

Regards,  
Sue Hatch

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy. It is not a low impact project and Maine loses more than it gains in the overall project. It is not serving Maine's electrical needs. CMP has lost sight of liking out for the people of Maine. This is a sad time that out of country out of state can forever change the face of Maine. In this time of crisis this project can not be pushed through without careful consideration of the forever impacts to Maine woods, people, and limited say. Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

**EXTERNAL: This email originated from outside of the State of Maine Mail System. Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

I have been hunting camping and fishing in the area of the proposed corridor all my life and can not believe the Maine DEP would ever grant a permit damaging this pristine eco system and natural habitat for Wild animals and crucial trout habit for ever. Your charge is to protect the Maine people that you represent from just this exact example. Please visit this area and reconsider your decision and back the Maine people you represent.

Thank you  
Richard Sullivan

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

Given the current public health crisis, DEP needs to extend its comment period by 30 days so Mainers have time to weigh in. I personally feel the project is moving too fast without enough consideration of consequences of project. This is a major undertaking in the context of a rapidly evolving energy macro climate. The current public health crisis is demanding Mainers' attention and the front center decisions concerning the project must not be neglected. There is more to be lost than gained by rushing here. Sincerely  
Greg Woodring

Dear Maine DEP Jim Beyer,

THE VAST MAJORITY OF MAINERS DO NOT WANT THE CORRIDOR!!! It is no benefit to us. A few million dollars payment to the State is nothing!! I fear that Mills may have received political contributions to support this. If so, this his makes a travesty of our political system. Please do not let paid-off politicians subvert the clear will of Mainers!

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

**EXTERNAL: This email originated from outside of the State of Maine Mail System. Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

I also think the data about methane generation from the water backed up by these dams proves that this particular hydro project is not green and shouldn't be purporting to be so. So to damage Maine's comparatively untouched forest for a project that isn't even clean energy for another state is completely inappropriate. In addition, if this project for some reason goes through we aren't being given nearly enough compensation for the damage it does to our state and tourism to the northern forest area. They could have run this through Vermont where it wouldn't have done such damage since it would run under the lake and underground and the only reason it didn't go that way is that Hydroquebec and Avangrid thought it was going to cost them too much and Maine would be easier to roll over! This is a bad deal for us and wouldn't even help Mass. to become more carbon neutral because of the methane generation. We should be focusing on what we can do here in the state with other alternative energy production including our own biomass projects, our own hydro that doesn't generate as much if any methane and our own wind and solar. Towns can take on these projects to give them more money than HydroQuebec is offering with this poor deal.

Please reconsider this permit and stand up for Maine's environment.

**Subject:** Please don't approve the CMP corridor permit

**EXTERNAL: This email originated from outside of the State of Maine Mail System. Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Dear Maine DEP Jim Beyer,

CMP should NOT get a permit to build the corridor because it overwhelmingly impacts Maine's environment negatively without a real stimulus to our economy. It's a short sighted solution and has not been properly investigated in regards to its long term effects.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club do not support this permit approval.

Please reconsider this permit and stand up for Maine's environment and future generations who won't get to experience the joys we had growing up in this outdoor state.

I'm also asking you to extend the comment period by 30 days due to the pandemic that we are currently facing. Mainers deserve a chance to comment and still work on balancing their lives at this trying time.

Thank you for taking the time to read this.

**Attention: Jim Beyer**

I am writing to ask that the Maine Department of Environmental Protection deny issuance of a permit for the CMP Corridor.. In general, the "Corridor" is a bad deal for Maine's environment and economy.

Specifically, I am in opposition to the Central Maine Power/ Hydro Quebec NECEC transmission line Corridor through the Maine Woods for the following reasons:

- 1) This transmission corridor carves 53 miles of devastation through undeveloped forests, fouling trout streams and harming habitat, wildlife, and tourism.
- 2) Large-scale, Canadian hydropower jeopardizes construction of new in-state renewable energy projects (and their new jobs).
- 3) The proposed CMP Corridor will generate billions of profit for CMP and Hydro Quebec, with little benefit to Maine.
- 4) Mercury and methane, byproducts of large-scale hydro, are two of the many significant impacts of these mega-dams.
- 5) Critically, such dams also harm Indigenous communities, depriving them of lands, clean water and edible fish.

Thank you.

Sincerely,

Penelope Z. Andrews

Hello,

I am a Maine resident. I formerly hiked all over western Maine. I always loved the views from the summits of Mt. Blue, White Cap, Barren Chairback and others too numerous to name. From some of the mountain summits in Maine you can see the vast Maine wilderness in western Maine.

CMP will ruin that. The Corridor will harm native fish, amphibians, reptiles, mammals, endangered and threatened plant species. Lush trees that absorb the carbon dioxide in the air. All of that and more will be ruined if you grant a permit to CMP/Avongrid/Iberdrola.

If CMP were a Maine entity it might be different. But they are a Spanish company greedy for profit. Screw the little guys: Mainers. Well, we are not going to let Iberdrola get away with this travesty.

The lengths they have gone to to try to hide their true mission with that corridor would be laughable, if some people were not so gullible. For the rest of us we wish we had the power to kill the project.

Hiring a private investigator to spy on and trail women working on the No Corridor effort; setting up a website: Clean Energy Matters. Who do they think they are trying to hoodwink?

Every step they take is not a trustworthy one. Half the things they say about the corridor are not true. They have pulled the wool over Gov. Mills eyes. She thinks this corridor is wonderful, it will bring just as much power to Maine as it does to Mass. and all of New England because it will enter the New England Power Grid.

So the premise of Iberdrola is that Massachusetts had no more sources of natural power so they need that produced by Quebec Hydro, which is also suspect.

Where does this all end? Please make sure it ends soon by not allowing the 'CMP' Corridor to get permitted.

Thank you.

Merrylyn Sawyer

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

Please keep in mind that there is great value in keeping as much of the state as undeveloped as possible. We can't put a price on the pristine wilderness we have in this beautiful state of Maine and as the years progress there are fewer and fewer wild places on earth. The value of our natural resources are truly priceless. Furthermore, the electricity generated will not go to Maine but rather just go through the state to another destination. If CMP truly cared about green energy they would make significant investments in wind and solar in the state and stop fighting solar companies and limiting the amount of green energy allowed in the grid. CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

I am against the power corridor proposed by Avanguard for the State of Maine. Other states have opposed it unless they were to bury the cables which they don't want to do because of the expense. So, the company chooses to hoodwink Maine into thinking that it is a good deal for Maine. It is not. Our beautiful woods will be forever altered.

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

PLEASE reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

I find it hard to believe that so much acreage of fairly pristine Maine forest is being sacrificed for "clean" energy to be delivered to another state, not even for our use here in Maine. New Hampshire rejected it, so the developers picked a route in Maine; it should be rejected here, also. CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Dear Maine DEP Jim Beyer,

I am a Registered Maine Guide and I continue to hike the AT in Maine. CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Maine's brand is our environment. If we allow CMP to build the corridor we:

- Segment wildlife habitat
- Degrade our wilderness during construction never to be recovered
- Create an eyesore to be seen in our wilderness and from it
- Won't reduce climate-changing pollution, and may actually increase it
- Threatened wildlife in many ways. The construction and maintenance would harm wetlands, vernal pools, and cool, clear brook trout streams. It would block deer from winter shelter and feeding areas
- Jeopardize the construction of new in-state renewable energy projects and clean energy jobs.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Maine's forest lands have been harvested for centuries, yet they regrow and regenerate, as best they can. The scars are always there, this corridor will never be allowed to heal, it will be one more permanent, ugly, scar on our forests. Please do your job "inviromental protection".

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy. Research has shown that the reservoirs for mega dam projects are significant greenhouse gas emitters. Depleting the northern boreal forest, not only in Maine but in Canada as well where the energy companies are rapidly damming up all of the wild rivers and flooding First Nation lands, resulting in a loss of culture and economic resilience for Indigenous peoples, means loss of habitat and important carbon sink to address our most pressing problem...the climate emergency. Massachusetts should be focusing on creating microgrids in their communities, using distributive local renewable power generation, and not building another powerline that loses power along the way and is a dinosaur solution in the 21st century. It's time to be creative and use the technologies we have to solve our problems and let the wild rivers run free.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Regards,  
Anne Burt

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it is a giant clearcut, that will adversely affect water quality in the Kennebec watershed, damage innumerable vernal pools, which require a canopy to work optimally, and degrade scenic value in a tourist intensive region based on the Kennebec River activities. All of these adverse effects are not balanced by any material advantage to Maine citizens or Maine government. The CMP claim of increasing renewable energy is not supported by facts. Rather it is a redistribution of a current renewable resource. It is passing the buck in our effort worldwide to decrease fossil based energy in favor of renewables such as hydro, wind and photovoltaic.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club all oppose this sweetheart deal for CMP and Massachusetts. Maine gets nothing but a giant footprint of environmental degradation.

Don't forget that your mission is environmental protection. Please protect ours from this vast project.

Dear Maine DEP Jim Beyer,

Maine does not benefit from this agreement at all. You must know that. There is no continued income for Maine except the initial lump sum over so many years. It is not tied in any way to the profits that CMP makes in the future. This is an absolutely bad deal for Maine. I love this state. Please don't let CMP ruin it. You also know that the environmental impact will be damaging to Maine. Please care. You have the power to stop this. Please don't let this happen. CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy. CMP has deceived us before, and Hydro Quebec is well-known (by anyone who has been paying attention for the last 30+ years) for raping the land in the name of "clean, renewable energy". Only Hydro Quebec, CMP and the State of Massachusetts (maybe) will benefit from the ruination of another vast swath of our scenic state.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

As the name of your department implies, I implore you to do what is right and please reconsider this permit. The Department of Environmental Protection needs to stand up now for Maine's environment.

Thank you for your serious consideration to this matter!

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

I cannot believe cmp is going thru with this even though the maine people want to stop them!

Dear Maine DEP Jim Beyer,

Beware some shady going on behind scenes,remember when paper mills were bought out and the buyer sold off the woodlands and ended up owning the the mills with the money free and clear.Spain obviously has NO long term love or regard for CMP nor the citizens of Maine. The offer is not worth it Maine is not for sale!!

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

I'm writing to express my strong opposition to NECEC. I believe the value of Maine's forests and other habitat that would be adversely affected, as well as the harm done to wildlife in a large and significant area, make this project unacceptable to Maine. It is regrettable that both NH and VT found this project lacking, yet Maine has continued along this damaging path.

Even though CMP has proposed certain financial compensations for Maine, no sum would be adequate for the permanent harm that will be done to this state. It is also inappropriate that financial assistance will go to low-income people in Massachusetts, but not in Maine.

This project should be denied for the above reasons alone, but it is also alarming to think that a company like CMP that has been ill-performing for years and is currently under massive scrutiny should be rewarded with our trust to properly carry out such a project.

Finally, survey after survey, as well as votes taken by communities affected by this project. show that a large majority of Mainers disapprove. That alone should be enough to scrap NECEC.

Thank you for considering my opinion in this matter.

Dear Maine DEP Jim Beyer,

I am writing ask you to reject the proposed, new CMP Corridor through the western mountains of Maine.

Despite what CMP and their lobbyist's say, the Power Transmission line, and corridor will provide no benefit's to the environment. Instead, it will degrade the environment by blighting the Woods, and Mountains of Maine with a permanent scar across the land that will need to be periodically herbicided to prevent tree's, and vegetation from growing back. As a result it will be of no use to deer, moose, birds, and other wildlife because there will nothing there for them to eat, and it will deprive them of the cover, and shelter provided by the woods. Also, the presence of herbicides that will get into the brooks, streams and ponds is obviously of no value to fish, and all other aquatic life.

I am a lifelong resident of Jackman, and my family has been here for several generations, The Woods and Waters of the western mountains of Maine are a jewel, where it would be a crying shame to ruin the wilderness qualities of this land with giant, ugly looking steel towers that carve up the landscape.

Please vote to stop the construction of these ugly steel towers through the woods of Maine. Everyone in Jackman, Moose River, and Dennistown is against the CMP Corridor, so hopefully you will help to stop this boondoggle from ever being constructed. Besides that, the only reason it has been proposed is to supply Massachusetts with electricity. New Hampshire, and Vermont have already rejected the power line for good reasons, and so should Maine!

Jeff Hall  
Jackman, ME

Dear Maine DEP Jim Beyer,

I implore you to reconsider granting a permit to CMP for the proposed corridor across our beautiful state of Maine. I find it unacceptable that Iberdola, a Spanish behemoth and parent company of Central Maine Power, should be allowed to build a corridor through some of the most beautiful and undisturbed sections of Maine in opposition to the wishes of Maine residents. The millions of dollars promised Maine will be paltry by the time payments are complete. The claim of removing 3 million metric tons of carbon emissions is questionable at best. The one certainty, if this corridor is allowed to proceed, is the environmental impact can never be undone.

In the unprecedented situation the world finds itself in, it is well to take the opportunity to reflect and consider. Maine's natural resources are not only a source of invaluable beauty and peace but are integral to a healthy Maine. The proposed CMP project, if not carefully scrutinized and tailored, threatens environmental balances central to our survival and prosperity. CMP is a foreign owned business interest whose primary allegiance is to its bottom line financial profit. The arguments proffered that the grid expansion is environmentally responsible are more rhetorical than sound comprehensive reasoning. I, as many others, implore the DEP to exercise their authority to ensure any activity of this project meets the standards we require for the future we seek. We have many alternatives for an energy secure future. To rush forward on some unspecified mandate is a recipe for disaster. The medical pandemic is a lesson in caution. Weakened systems are vulnerable. Let's proceed cautiously.

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy and a bad deal for our national effort to reduce greenhouse gases. It will also do unrecoverable damage to a huge amount of wilderness acreage.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree. We worked hard to save the Cold Brook watershed. The corridor would go right through it. This would ruin great trout habitat!

CMP is owned by a foreign company that should not dictate how we manage our State! They may be offering us some peanuts but this about their profits at the expense of the citizens of Maine.

Please reconsider this permit and stand up for Maine's environment.

Dear Maine DEP Jim Beyer,

Hi Jim, This project has many aspects that are not in the best interest of Maine's people or environment. The impacts on atmospheric contaminants from the huge dame in remote Quebec have been underplayed and will increase as Hydro Quebec builds even more dams already on the planning book.

While the actual transmission line (s) through a major wilderness area of Maine will bring its own detrimental impacts on the forests and waters future expansion of this corridor, something that is inevitable, will only exasperate these impacts.

Let the people vote on the issue and let their decision be the deciding factor on whether this thing is built.

Thanks, Fred

Dear Maine DEP Jim Beyer,

I have been watching, with some degree of revulsion, as the CMP Corridor Project continues to move forward. I have many concerns.

The most pressing concern I have at this time is regarding the actual entity in charge of this project-- CMP. I am confident that I need not say more, considering CMP is objectively the most hated utility company in the entire nation. They have no regard for their customers, and they find a way to bungle just about every new project. Surely this corridor will be no different.

Consider how they treated us Mainers in the earlier phases of the project-- the initial plans had no economic incentives or benefits for Maine. They had to be talked into it. Dozens of towns held meetings wherein the corridor was officially condemned. CMP then shrugged and went over the town's heads. We are mere speed bumps to them; their shockingly belated PR campaign about the corridors alleged benefits does not change that.

This corridor is not for Maine. It is for Massachusetts. Maine is just in the way.

Then there is the environmental aspect. I need not tell you that tearing a swath through the Maine woods to install hundreds of miles of repugnant eye-sores will be bad for the environment. How many animals will die? How many microecosystems disrupted? These are questions that cannot be ignored, certainly not by the DEP.

I live in Western Maine. We have no great theaters, no famous museums. These beautiful woods are all we have. Please do not allow them to be sullied by such a base and incompetent corporation for the benefit of Massachusetts.

Now is the time to make a stand for Maine. For her environment, for her people. Allowing this corridor will do little good (to Massachusetts) and much harm.

Please, please reconsider this permit.

Regards,  
Eric Winchester

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

Environmental groups including Trout Unlimited, Natural Resources Council of Maine, and Appalachian Mountain Club agree.

Please reconsider this permit and stand up for Maine's environment.

Regards,  
Daniel Beetz

Dear Maine DEP Jim Beyer,

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy. I've seen this same scenario in other states and the utilities are only looking at their bottom line - not at protecting anything for consumers and residents.

I'm not going to claim detailed knowledge of the truth of their claims but the people of Maine need protection from utilities owned by out of country corporations who are definitely lying in their ads. Their claims mirror that of Dominion's in Virginia with a pipeline there. Lived there then and now live here. Please stop this.
