Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause.

Thanks,
Priscilla jones

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. Our wildlife is already forced to come into our towns due to their eroding habitats. Please stop the CMP corridor now, and keep Maine's remaining wilderness pristine.

Thanks,
Deborah Cordeiro

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. I grew up in Franklin County and I am horrified that we are even considering this corridor through some of the most beautiful wilderness left in Maine. The impact on fragile ecosystems is too costly! It is time to move away from further infrastructure for fossil fuels, and on to increasing renewable energy sources built in places that are already developed by humans.

Thanks,
Heather Estey

Status quo, those in Maine's government trying to push this through. Wonder how much money in their pocket to do so?

Please don't be like those government officials DEP.

The Maine woods are so important to Maine people, are you thinking of them? Are you thinking of the businesses that survive because of the Maine woods? I keep seeing how this is good for Maine's economy but I don't understand how it can be if all the power goes out of state. As a Mainer born and raised in Northern Maine, transplanted to Central Maine, who enjoys the western Maine woods, I want to understand how this is good for Maine.

Thanks,
Lori Smallwood

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. Letting big companies like CMP dictate, what they can and will have is not the right direction for our future generations. CMP has already started work without approval, trying to tell people we will get what we want, no matter the consequences. We need to think about the future for our children, grandchildren and there after. What kind of life do you want for the future generations of your family and yourself?

Thanks,
Amber Dill

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor.

I've been a Mainer my entire life. In spite of the frigid winters, I choose to remain here because of the natural beauty and my faith in Maine people to protect its natural resources in a world where some would see them ravaged for profit. It breaks my heart to contemplate the destruction this project would cause to Maine's land and the wildlife that survives on it.

And it's not only destruction of the land we must consider, but the disruption of natural systems that have existed here in a fine-tuned balance over many years. The complexity of these systems means we cannot accurately predict the trade-offs of this project. It is impossible, then, to weigh its benefits and drawbacks. We must err on the side of caution.

Even if the project were proven to reduce greenhouse gas emissions (which it is not), I would still say that it is not enough. How can we make that trade? How many reductions in greenhouse gas emissions justify the destruction of this invaluable wilderness? It is not for us to say. While I agree wholeheartedly that we must make swift strides to curb carbon emissions, this is a lame attempt at doing so. The true motives of this project are insidious and poorly-disguised. Rather than going back to our old, worn out ways, can we have the wisdom and the courage to find new means of combating climate change while also being conscientious stewards of our land? I believe not only that we can, but that we must.

Should this project be approved, the corridor would be a scar to Maine's wondrous beauty and to the pride of Maine's people as its guardians.

I urge you to deny Central Maine Power's permit application to construct its New England Clean Energy Connect transmission corridor in Maine.

Thanks,
Rachel Bolender

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. Any decision on it must be delayed (because of the current crisis) so that consumers/citizens can make their judgment known in the procedure upon which this country was built. No amount of pre-mature investment nor pervasive influence on governing bodies justifies evasion of the democratic foundation. Maine- the way life should be.

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause.

Thanks,
Deby Smith

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. There is no benefit to Maine...This is for transmitting power from Canada to Massachusetts.. The people of Maine do not want this...Mass can build hydroelectric plants on the Connecticut River for their power needs. They (Mass) also have the option of wind farms to produce green energy..This is all about big business from away.. Its also not healthy for people living in proximity to the proposed transmission lines.. Thanks for reading, hope you act in the best interest of our state (Maine)

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause.

Thanks,
Elana Jenkins

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic.

Thanks,
Stephen Burt

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic. One thing that I have not seen discussed is the comment that this corridor will give more access to renewable energy. To me this sounds like there will be windmills on all the mountain tops, and a network of power lines all through the Maine woods. These windmills can just as well be in Massachusetts if they want more power. Respectfully, M.David Lord

Thanks,
David Lord

Dear Maine DEP Jim Beyer,

"There is a magic machine that sucks carbon out of the air, costs very little, and builds itself. It's called a tree" George Monbiot.

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic.

I live on Forest lake in Windham, Maine and I am seeing, 1st hand how devastating it is to allow industrial projects to go forth without any thought to the environment and to the surrounding neighborhoods. As a lakefront resident I work hard to keep this body of water clean and every year it gets more and more difficult as the DEP turns it's attention away from the impacts of human destruction all for the greed of outside corporations. I grew up with a place to escape on Chesuncook Lake and even that has changed due to the influx of folks wanting to change the accessibility of that beautiful area. Now we have a corridor that will wipe out a large swath of forest and cause erosion near waterways in several areas. I know first hand that waterfront areas are watched very closely by you but, to be honest, during this administration you seem to be working with your hands tied behind your backs and when we, the people of Maine, are making it crystal clear to you that we do not want this project to be forced down our throats, you really don't have any power to shut this down. Are you seriously going to weaken your power to keep Maine safe and beautiful by allowing the greed of outside corporations and politicians to step all over you? I beg of you to stop this devastating project in its tracks.

Thanks,
Catherine Whorf

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic.

Thanks,
Beverly Bossie

Dear Maine DEP Jim Beyer,

CMP is sending me near daily flyers, spending MY money on their campaign that I am against, while service bills remain questionable. They own me thousands of dollars they aren't willing to pay. I'm contacting you because I STRONGLY OPPOSE CMP's corridor. There's more than ample evidence that the permit should be denied and Mainer's overwhelmingly don't want it, including the scale of the economic and environmental impact the project will cause. Our environment runs our economy and CMP can care less about our environment. I also would request that the public comment period be extended for 30 more days. It's a global pandemic, after all.

I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic.

When a new corridor is permitted through a beautiful, remote part of Maine, it opens the door to grid access for Western Maine wind projects. Wind will never get across the Kennebec Gorge without NECEC being permitted. Other infrastructure could easily follow. NECEC is the foot in the door to spoiling parts of Western Maine.

I don't see how there is a need for NECEC in Maine. Why not allow Vermont to take it with the same benefits provided to the grid. We don't need NECEC! Permitting a new corridor is a huge move, especially in the area proposed. Please reject permitting this for the sake of the state of Maine, especially Somerset County.

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic.

Thanks,
Kenneth Hanson

Dear Maine DEP Jim Beyer,

Sir:

I'm contacting you because I oppose CMP's corridor. As a net energy exporter we don't need the power line and the 53 mile clear cut that's required. The power line benefits Avangrid/ Iberdrola, Hydro Quebec and to a very small degree CMP. It doesn't do one damn thing to help THE PEOPLE OF MAINE. Again, Maine doesn't need this. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause.

Please, I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic.

Thank you!

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic.

Thanks,
Perley Sasuclark

Also I don't see how it will help or contribute to the Maine people it only helps states to our/Maine's south. This is a bad deal for Maine folks, none of this power is coming to us and why do they show the lines only going to Lewiston ME. and stop? Why don't they tell the truth that it goes to MA.

Thanks,
Donald Howlett

Our neighboring states to the west were not in favor of this project crossing their woodlands and most of us in Maine are not either. They didn't even offer Maine any benefits at first...until it became apparent they would have to. CMP was rated 87th (!!!!!!!) out of 87 corporations in a recent survey. They are not accountable to the consumer and have proven that time and time again. Please do not let them ruin Maine's gorgeous wildlands. Tourism is a huge business in Maine, involving one of every 6 jobs, and these types of project will ruin that forever. They will find a way to connect without Maine. Please deny this project.

To not offer the public ample opportunity to share the true impact this project will have for the area and the State would be a disservice to all. Especially in a critical time for all, with restrictions responsible Miners should be following, and for safety of all who should be a part of this process, please grant a delay. Thank you.

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor, as the current contract is written anyway. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic.

Here's another item of contention I feel is being purposefully ignored. As stated above, Maine is getting a raw deal concerning the future of this project. Oh, I've heard about the number of jobs being created, but few will be permanent in nature. Building that power line takes a little over a year to build, so all of those construction jobs will disappear. Yes, Lewiston will partially replace their grid. Though anything but complete, it is a start. But this is Maine's property you're giving away - the use of it anyway. Same thing happened when then Gov. King rushed the approval process through - when his partnership of owners ran the wind-powered project approval process through and gained approval without the masses of Maine residents even knowing that project was in an approval process. Now that project is in place, the State of Maine gets NOTHING. The town where the generators are located got \$??? for twenty years I believe. That time is about up, then they'll get nothing, forever. Those partners are the only one who will profit.

To help mitigate the concerns stated about, I believe this Corridor Project contract should be re-written, before anymore approvals are granted. To wit:

- 1.) I believe the State of Maine should receive royalties forever, every month, to the tune of two million dollars a month, just to begin with. Let the owners, stockholders, and ratepayers of those who will benefit from this new source of energy (outside of Maine) and even the company of this source of energy, pay for these royalties. We're helping them sell this project by a show of our approval.
- 2.) Additionally, I say the figures for these royalties should be reviewed for a rate increase at least every two years. Only Maine will review and approve any rate hikes for these royalties. I would leave it to the entire Maine legislature and the Governor of Maine to decide where and how these royalties would be used. (I might suggest though, that they begin using it to rebuild the remaining portions of Maine's power grid, to be useable for another 150 years.) It's about time Maine politicians put Maine FIRST. If you want the people of Maine's approval for the Corridor Project, make the necessary changes to make this little bit, in Maine's favor.
- 3.) These royalties should NEVER preclude the State of Maine from benefitting in ANY OTHER WAY, from this overall project.
- 4.) The re-written contract should also include a clause, that any value-added / overhead costs will NEVER be born by the State of Maine for ANY reason.
- 5.) The re-written contract should also include a clause stating that these terms will NEVER EXCLUDE the State of Maine from joining the ranks of customers of this project, and NEVER having to pay a higher utility rate than ANY OTHER rate-

paying customer (in the United States of America, at least.)

6.) Lastly, the re-written contract should include a clause that the State of Maine will NEVER be held liable for the loss of power, and/or equipment, or personal liability to any person or organization in Canada or the rest of the United States of America, unless the loss or damage can be legally linked to a criminal act perpetrated by a permanent resident of the State of Maine. This also excludes "Acts of God," such as tornadoes, wind storms, snow storms, radiation damage caused by solar flares from the sun, etc.

7.) I strongly believe this pittance of money from the overall profits this Corridor Project will create, could be construed as a good-faith gesture from all concerned parties, toward the State of Maine.

8.) As a good-faith gesture from the State of Maine to all other concerned parties, I might suggest that these royalties only being when the project is built, tested ENOUGH, that the generating company begins sending electricity down the line. That doesn't mean waiting until the project fully built, fully tested, or sending a full change of electricity down the line. It should begin when testing is complete enough that the power generating company sends the very first amount of electricity through this Corridor Project's power lines through Maine.

I understand the terminology I use here may need revision to make it legal, but my point is, without this sort of good-faith (CONTRACTUAL) gesture, I would NOT recommend approval of the Corridor Project. Again, put Maine FIRST.

One last request - Regardless if my suggestions are approved for use by the Maine DEP, please forward my email to Governor Mills and to the full Maine State Legislature.

Thank you all for your time and efforts. I really appreciate the chance to voice my opinion.

Very respectfully,

Rex J. Harrison

Thanks,
Rex Harrison

In fact, I consider that it would ensure an undemocratic process to go forward with normal deadlines related to this process in a situation in which much of the state is under voluntary quarantine. In view of the environmental impacts that do not appear to have been fully considered and the plain fact that this project is not for the benefit of the citizens of Maine, all due care and diligence must be taken before any approval is issued.

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic.

Thanks,
Henry Harrell

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I also would request that the public comment period be extended for 30 more days. There's no need to rush this project through, especially during a pandemic.

Thanks,
Susan Gargiulo

There is nothing in this for Maine residents. CMP should not be allowed to proceed. They have demonstrated poor management and a disregard for Mainer's concerns, not to mention a history of incompetence and poor accounting/billing practices

Does DEP stands for Department of Environmental Protection?

If so,

Please do your job and protect our environment.

STOP THE CORRIDER

Environmental Protection places the environment ahead of special interest.

There are better ways to provide power.

Hi

I moved to Maine 43 years ago & was vacationing here before that. In that 43 years I talk to people every day with my job from all over the world. I'm blessed to live in a tourist harbor town. So of course we talk about Maine that's why they came.

Everyone has the same basic thoughts about Maine; the cleanliness the outdoors, the stunning beauty.

Telephone transmission lines are not that. This is old technology look to newer more vibrant ways without destruction of Maine's beautiful nature, which is what makes Maine what it is.

Even more than that we were told over ten years ago that CMP could not update our peninsula with its growth & we were told to look elsewhere (ie solar, wind) was their suggestion at that time to keep up with the growing demand. So obviously we weren't enough profit for them to do this for us, but it's OK for them to use us & destroy what we are & what makes us profit our view.

CMP has not been an honest company to date with us in the past & I certainly do not trust them now

I Have lived in th wesrtsern mountains of Maine For over 40 years and I believe it is time we stop destroying our state just to benefit big companies and other states. I don't know how much camp is paying the PUC to support this corridor but watching what has been going on and the way they support CMP all the time it must be plenty. If the other states need more power let them figure it out in there own state and stop this distruction of putting a corridor to support Massachusetts.

Good Day;

The stop the corridor movement is supported by 73% of Maine people who do not see any long term benefit to our Beautiful State of Maine. If you go forward with favorable approval; you will be ignoring the voices of 73% of your neighbors, you will be giving the okay to up-root 150 miles of pristine Maine woodlands and wildlife, you will be okay with 7,272 acres of power line emitting electromagnetic radiation and you will be okay with the money of Special Interests taking away the right of Maine people to preserve the very land that you have been assigned to protect.

Given the advancing technology of clean energy that is available to Massachusetts they have the responsibility to generate clean power within their own state without disrupting our pristine forests. The 300,000 tons of carbon emissions saved is a non tangible number. It will not be a reality and we will be left with 150 miles of unreclaimable forests under your watch.

Help keep Maine from the Special interests groups whose real interest is not with 73% of the people of Maine.

Thank you,
Carroll Gautreau

CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy.

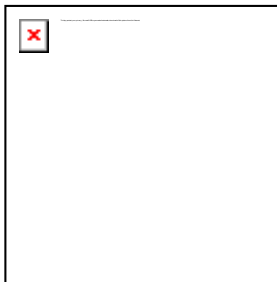

As a backpacker, Registered Maine Guide, member of Great Old Broads for the Wilderness, I write to ask Maine Department of Environmental Protection to halt the CMP Corridor.

To destroy even an acre of our wilderness is too much. We are losing wilderness at an alarming rate with the current US Republican administration opening our federal lands to more drilling, mineral extraction, and more environmental degradation. We cannot afford to lose any more.

Please stand firm and help preserve Maine. We depend on it for our economy, our jobs and our future.

Very best regards,

Nancy E. Randolph

Dear Mr. Beyer,

The people of Maine DO NOT WANT THE NECEC CORRIDOR. We have made our position clear. CMP shouldn't get a permit to build the corridor because it's a bad deal for Maine's environment and economy, and it's not the will of the people. It's the will of big business and in this time of climate change this needs to stop. Are you a flat earther??? For heaven's sake. Stop this project.

Hello,

I would like to voice my opinion of the corridor. I believe this is a bad option for the State of Maine. We have a beautiful state and tearing through the middle of it would be a shame. This state attracts so many people for so many reasons (hunting, fishing, hiking, snow sports, nature observation) because of it's raw, natural beauty. I believe in tourism but the opening of this land and for this reason will ruin the main reason why people love to live here and to come here. We are a unique state with all the small towns, lakes, ponds, rivers, forest and mountains and having to too many people will destroy our wilderness and what it is that attracts people here. I also believe the people of Maine are proud of our way of life and in many places in this state it is being turned into a very different way of life. I live on Mount Desert Island and am so grateful for the National Park that is here and the opportunities that it has brought to our way of life but I also see the abuse of land and way of life around this area. It is a fine line and I would hate to see one of the most beautiful places in our state become something other than what attracted people here in the first place. I believe the corridor is not a good deal for our state or for our people and that is should be stopped.

Thank you,
Margaret E Smallidge

Dear Sir,

I don't trust CMP to do as they claim and not destroy the beauty of the area they want to put this corridor on. Historically they've proven their lack of trustworthiness. One only has to speak with the former townspeople who were displaced by their damn on the Dead River.

The affected area of Maine is one of our remaining untouched attractions here in Maine; in fact it's a remaining such tracks in the entire eastern part of the country. Yes what remains "after" construction might not be much more involved than the transmission lines in existence but all one has to do is look around any of the numerous power lines in the state to see how environmentally devastating they are. Heavy equipment and the numerous people power it takes for such a construction further ruins the landscape. The majority of this power won't even benefit Maine people; it's meant for destinations out of state. We should no longer be a "corridor" for the benefit of others. Please, use your power to stop this!

Sincerely,
Debi Blank

Hello

Just some facts. I want you to stop this CMP Corridor!!! The whole state needs to vote on this in November.

FACT: Central Maine Power (CMP) will create a corridor through pristine Maine forest that's as wide as the New Jersey Turnpike, crossing the Kennebec River Gorge, the Appalachian Trail, 263 wetlands, 115 streams, 12 inland waterfowl and wading bird habitat areas - as well as brook trout streams and deer wintering yards.

FACT: Central Maine Power's project includes much less assistance for Maine than similar proposals in New Hampshire and Vermont, which include hundreds of millions of dollars in economic development assistance and environmental mitigation.

FACT: CMP will use proceeds from the NECEC corridor to fund [assistance for low-income residents -- of MASSACHUSETTS](#). No similar program for Maine residents has been proposed.

FACT: CMP has a troubled history. They are currently under investigation for overbilling thousands of Maine customers, as well as for their dismal response to a massive power outage last winter that left hundreds of thousands of Mainers without power. The company's CEO publicly apologized for their mistakes in a television ad campaign currently running on Maine television.

FACT: CMP is currently being sued for fraud. According to the suit, CMP purposefully deceived customers about the reasons for massive spikes in their electric bills.

Fact 53 miles of new, 150-foot-wide transmission corridor through western Maine would fragment the largest expanse of intact temperate hardwood and mixed forest in the world; and

The Central Maine Power corridor project is ill-advised for numerous reasons. In addition to causing the destruction of vast wilderness areas and watersheds, the project will not achieve the purported purpose of net carbon dioxide reduction. Additionally, none of the transmitted power benefits Maine citizens. This project was soundly defeated in New Hampshire. So, I was puzzled when Gov. Mills decided to support this travesty. Then I learned that a memorandum of understanding was drafted between CMP and the so-called "nonprofit" organization Western Mountains & Rivers Corp., dated May 30, 2018.

According to this memorandum: "Within ten (10) days following the execution of this MOU, CMP will donate the amount of \$250,000 to WM&RC to support its charitable mission, including funding WM&RC's initial startup expenses such as legal, accounting, consulting, staffing, travel and planning expenses."

The memorandum goes on to state: "Commencing on the first anniversary of the execution of this MOU by both parties, (CMP agrees to) provide to WM&RC annual grants for five years in the amount of \$50,000 each year to support WM&RC's charitable mission."

Exhibit C of this memorandum lists members of the board of directors of the Western Mountains & Rivers Corp. Included on this list is Peter Mills, brother of Janet Mills, now the governor of Maine. This raises serious questions and concerns about conflicts of interest inherent in a board member being the brother of Maine's governor as it relates to her shift in support of this misguided project.

CMP has pledged \$500,000 to this organization. Hmmm. Sadly, money talks. CMP is literally buying support with promises of cash to organizations and towns along the proposed route. No amount of money is worth permanent destruction of wilderness, watersheds and many western Maine citizens' livelihoods and way of life.

Regards
Leo M Todd

Please, do not approve this project. CMP and it's big money, when caught misstating this project simply change their ads,

New Hampshire and Vermont have already denied a similar project through their States. Maine already has several high transmission lines and widening the existing line does nothing for Maine. CMP has touted the benefits of widening the corridor without supporting facts.

Widening the corridor harms the wildlife, water and overall environment. Again with no demonstrable benefit to Maine.

Please, DO NOT approve this project!

Mr. Beyer,

I will be as brief as possible, I'm sure you are processing many responses.

Something that always gets lost/hidden in the spreadsheets. THE IMMEDIATE DEVASTATING TOLL ON THE ENVIRONMENT FROM THE PROJECT ITSELF!

For example — consider the manufacture and transportation of hundreds of thousands of tons of steel, wire and rubber. Think of when you are using your chainsaw or snowblower, etc. Breathe some of the exhaust and then consider the monstrous cloud of completely black pollution being put into the atmosphere. The scale is incredible.

That's why the worst utility group in the country (CMP) leads with the biggest lie - that this is clean energy.

The spreadsheets never capture this - they were designed not to.

Thank you and best regards,

Richard Papetti

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor.

Central Maine Power owes it to their customers, us to do right by their mistakes and gross negligence. This project provides little relief to the outrageous bills, the mishandling of bills or long time promises of lower rates that never came.

CMP has viable offers in other states where they can build their corridor without sacrificing Maine.

There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause.

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause as well as the longstanding incompetence of Iberdrola/CMP. Let it go through the already approved underground route through Vermont. Vermont will also be far more compensated than Maine. For me cutting our forests will take away the benefit of forest for carbon sequestration while Hydro Quebec refuses studies that would show this energy will in fact reduce carbon emissions. This corridor is a bad deal for Maine but a better deal for Vermont's already approved underground line.

Please say NO to NECEC!

Thanks,
Judith Hyde

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. This short term corporate money grab by foreign entities will destroy what brings vacationers, second home residents, and small businesses to the region. This corridor will certainly open the door for massive industrial wind farms on our pristine mountain ridge lines. The effort to develop and operate a successful business in Greenville and the North Woods is no small endeavor, and with this corridor.....well, you trade nature (and yes, trees are necessary for the environment), local economies, and God's natural beauty which is an asset that has become increasingly rare and will become more and more valuable in the future, for what?

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. HydroQuebec is under no obligation to protect the habitat and resources of the indigenous population of northern Quebec or to promote other clean sources of energy. Massachusetts will benefit far and away more than Maine. The new portion of the corridor would cause significant damage to the woods and wildlife and the recreational assets in the region.

As a resident of Lewiston, I realize that my city would benefit financially from the CMP project, I feel that the State of Maine as a whole would not benefit and in fact might well be damaged.

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I am a retired Eng. that spent my career with a company that mfg.& sold measurement devices, control systems and computer systems world wide to Utility Co's for fossil, nuclear and hydro generation. I have never seen a Power co go from the top to the very bottom rating as CMP has. Our decision makers are not seeing how corrupt the applicant is, they don't deserve our trust or consideration. They have proven to be completely untrustworthy.

Lets not embarrass our entire state and be the laughing stock of the technical world.

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I do not support this project. Please deny all permits until the people of Maine have had a opportunity to vote on the CMP project. While CMP has been raising prices, cheating Mainers, and spending millions of dollars on advertising with false claims for this project, Mainers have been denied a voice. Please do not allow anymore permits until Maine citizens have had a chance to vote on whether they want this project or not.

Thanks,
Jody Telfair-Richards

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. Also why destroy our wilderness when other states are more concerned about their wilderness and denied this power line, than our DEP or state is. For Gods sake hear the Maine people. This does not help the State of Maine on the cost of our electricity, where is our direct benefit. This power is being sold to Massachusetts not the State of Maine and it is only to line the pockets of CMP and their owners by billions of dollars. NO

Dear Maine DEP Jim Beyer,

I'm contacting you because I strongly oppose CMP's corridor project. This project is bad for Maine and for Mainers. It will be extremely destructive to the North Woods where the new 53-mile swath will be cut, traversing native brook trout streams, disrupting innumerable wildlife habitats, and imposing unsightly towers through areas that draw tourists and sports people to the area for the very reason that there are NOT such there monstrosities there now.

Further, CMP claims that this project is all about clean energy, but we know it's all about profit. There will be no more clean energy produced than there is currently, only diverted from other areas to fulfill a Massachusetts promise. CMP lies that this project somehow has great benefit for Maine, but the pittance that they are giving to the state over 40 years is nothing compared to the profit they stand to make. They say it doesn't cost Mainers anything, but indeed, the price of giving up the North Woods is remarkably high, and this damage cannot be undone. We can be sure that it will only get worse when CMP decides to allow some pipeline or other damaging project to tag along.

As a Mainer who will be affected by this disaster at our camp in The Forks and at home in Durham, I implore you to oppose this project and listen to the will of Mainers who despise the very idea of the corridor: Please stop this project now!

Thanks,
George Samiljan

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor.

I am A working Electrician in Southern Maine and don't think that Maine will be better off by helping Massachusetts use more energy as thats what this project is for, not maine.

If we do not allow the Massachusetts power suppliers (whom we now have to supply the added needs for mass) will have to either tell Mass to limit use as there power will be unattainable which will force them to build more solar fields.

Thanks,

Dear Mr. Beyer,

I understand the importance of a clean a environment, what I do not understand is that the need for the MAINE DEPARTMENT OF ENVIRONMENTAL PROTECTION is concern with the Canadian environment. Maine is not producing power that would or will impact the power grid. Why are are we selling of our wilderness our wildlife and the beauty of our state for our neighbors and a few dollars. The cost to our way of life is not worth the return. Do not let these big Maine companies sway decisions made, because of their own profits and bragging rites. Thank you hopefully your decision will allow you to look in the mirror and protect our state.

Dear Maine DEP Jim Beyer,

As a lifelong Mainer I'm ask you please do not authorize a permit to build the corridor. I have so many reasons for not supporting this project and I'm sure you've heard them all.

Basically, I do not think it's something Mainers need or want. The "so called" benefits are exaggerated beyond recognition when you look at the details. The extent of damage to our environment is downplayed so much it would be laughable if it wasn't so serious. And, the hubris of CMP in it's communications, customer service, billing errors, and rates should be ridiculed, not rewarded. Please do not do this to Maine. I love my state and the people who live here. We don't need or want this. Thank you. Elizabeth Huntley, Portland

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. Please do not let this disastrous corridor go though, once the land, trees and vegetation is destroyed, there will be no way back from it.

Thanks,
Ronda Piotrowski

This will NOT benefit the people of Maine. NO power for Maine????? Who's bright idea is that?

Maine's power costs are some of the highest in New England and despite what CMP is saying the only benefits will go to the stock holders & a company that exists outside of the USA and does not pay taxes.

Dear Maine DEP Jim Beyer,

A recent study by MIT scientists concluded that the CMP corridor could actually result in a reduction in carbon emissions if the hydropower could serve as a battery in times when solar and wind power in New England cannot meet demand. Their model requires that the power line be reversible BUT, this is not possible according to the long term contract with Mass. Another fact is that the power line will reduce the likelihood that states like Mass will develop enough wind and solar. We do need a power line but one that allows Maine wind and solar to easily hook into it. This power is a bad idea and you should provide leadership by rejecting it.

Dear Maine DEP Jim Beyer,

I am writing to voice my opposition to the CMP power line corridor in the Mountains of western Maine. Both my Father and I grew up in Jackman, ME, where we extensively hunted, fished, and logged the forests and mountains where the proposed power line would be built. This is beautiful country where it would be crying shame to permanently scar the land with a power line that will degrade the woods and waters of western Maine.

It will require a permanent road for construction and maintenance, and periodic herbicide treatment to prevent tree's, and vegetation from growing back, therefore meaning it will be detrimental to fish and wildlife forever. On the other hand, logging roads and clear cuts grow back with thickets of bushes and small growing tree's. In twenty year's you can't tell a logging road was even there. However, when land is sprayed with herbicide, deer, moose, birds and other wildlife will be absent, because there will be nothing for them to eat That is exactly the case of the Jackman airport when the surrounding land is sprayed with herbicide.

Many people come to Jackman to enjoy the mountain's, woods, and waters in the area of the proposed CMP power line corridor, and the same goes for all other towns within the vicinity of the Corridor. Most local people enjoy it too. Therefore, we do not want to jeopardize an extremely valuable attraction for so many people who wish that the Mountain's, Wood's and Water's remain as they are.

The area is a jewel that support's economic, and recreational well being of our Towns, and State.

The worst part of all is that the CMP Corridor will be of no benefit to Maine, because the only reason to build it is to supply Massachusetts with electricity. Let them produce their own electricity, but since they refuse to use high density sources of energy like oil, gas, coal, and especially nuclear power from uranium, thorium, etc.. they expect Maine to help satisfy their demand for electricity? New Hampshire and Vermont have already rejected their proposal for sound reason's, and so should Maine.

For the reasons I have stated above, the people of Maine are against the CMP Corridor. Especially in Jackman, The Forks, Bingham, Farmington, Starks, and other small town's along the proposed power line, where the opposition is over 90%. It is ironic that the people from Massachusetts who recreate in our mountain's, wood's and water's come from a State that is fervently advocating for such a boondoggle. The only reason for this, is that three unelected bureaucrat's on the Maine Public Utilities Commission get to decide what nearly all of the Maine people reject!

Since the people of Maine have mandated that the CMP Corridor is rejected, every possible effort to prevent the construction of the CMP Power Line must be exercised.

Please do what you can to obstruct this monstrosity from ever being constructed!

Sincerely,

Jeff Hall
Jackman, Maine

Thanks,
Jeffrey Hall

Dear Maine DEP Jim Beyer,

I am writing to ask that the Maine Department of Environmental Protection deny issuance of a permit for the CMP Corridor. In general, the "Corridor" is a bad deal for Maine's environment and economy.

Specifically, I am in opposition to the Central Maine Power/ Hydro Quebec NECEC transmission line Corridor through the Maine Woods for the following reasons:

- 1) This transmission corridor carves 53 miles of devastation through undeveloped forests, fouling trout streams and harming habitat, wildlife, and tourism.
- 2) Large-scale, Canadian hydro-power jeopardizes construction of new in-state renewable energy projects (and their new jobs).
- 3) The proposed CMP Corridor will generate billions of profit for CMP and Hydro Quebec, with little benefit to Maine.
- 4) Mercury and methane, byproducts of large-scale hydro, are two of the many significant impacts of these mega-dams.
- 5) Critically, such dams also harm Indigenous communities, depriving them of lands, clean water and edible fish.

Thank you.

Sincerely,

Penelope Z. Andrews

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause. I thought the DEP job was to protect the environment. So do your job and protect Maine's natural resources.

Thanks,
Derik shean

Hydro Quebec's hydropower has substantial negative impacts on the environment, from the methane released from the flooding of forests in Canada to the intrusion on the woods of Maine, and the project will have a negative effect on renewable energy projects here in Maine.

Vermont and New Hampshire rejected similar proposals and Maine should also!

Dear Maine DEP Jim Beyer,

...Not for We the People of Maine but for They the People of Spain....

I, like many of my fellow Maine citizens, remain very concerned about the CMP Corridor being forced upon us without our consent or due diligence. I spoke through mail with Congressman Jared Golden awhile back, and he was very clear about the dangers this project poses to our environment, tourism, and numerous fellow communities across our state.

While CMP continues to spout lies in every community they visit, and stuff millions of dollars in any pocket who may be capable of mounting a successful campaign to shut them down, they cannot be allowed to break the laws which hold all of us equally accountable. Laws which exist precisely for the purpose of ensuring that corporations like CMP cannot do whatever they want without full disclosure and an agreement by the majority of citizens who will be affected by their actions. In this case, that would be every citizen in the state of Maine from a newborn to the oldest elder. Whatever CMP does within the borders of Maine through their proposed project will impact every Maine citizen negatively in one way or another.

This project will cut a 53-mile swath through our state's northwestern pristine natural resources for the foreseeable future of generations to come. They then propose to further destroy our national resources by building a pipeline under the Kennebec River.

<https://www.mainepublic.org/post/cmp-says-it-will-tunnel-under-kennebec-river-gorge-proposed-transmission-project>

Imagine the sheer scope of environmental destruction this construction project will bring to the communities throughout the area and their environments for decades to come. And let's not even fathom the nightmare that would follow if any aspect of that tunnel were to fail. Let alone the cost they would expect Maine taxpayers to shoulder while they try to figure out how to fix the problem and clean up afterward if it is even feasible to achieve it.

In addition, they have further concluded that their project takes precedence over our national parks. Has anyone brought this to your attention? Has CMP brought up this important point to any of its opposition? National park you say? Why yes!

<https://www.nationalparks.org/explore-parks/appalachian-national-scenic-trail>
www.appalachiantrail.org

About the Appalachian Trail Conservancy:

The ATC was founded in 1925 by volunteers and federal officials working to build a continuous footpath along the Appalachian Mountains. A unit of the National Park System, the A.T. ranges from Maine to Georgia and is approximately 2,190 miles in length. It is the

longest hiking-only footpath in the world. The mission of the ATC is to preserve and manage the Appalachian Trail – ensuring that its vast natural beauty and priceless cultural heritage can be shared and enjoyed today, tomorrow, and for centuries to come.

According to CMP's proposal, they will have to cut their corridor right through part of the Appalachian trail to reach Canada. And it seems, given their proposal, CMP has decided for itself, and us, that they have the right to do so. Don't national laws protect against that kind of behavior?

If CMP suggested that they should build their corridor across the Grand Canyon, what do you suppose the response would be? What if they proposed to build their corridor through any National park in this country? Would the response be any different?

Here is further food for thought coming from Maine's Congressman Golden. He specified, "This project would likely impact Maine's forest and wetland ecosystems as well as the communities along the route."

"It also needs to be reviewed by the United State Army Corps of Engineers (USACE) and Environmental Protection Agency (EPA)."

"I requested that the USACE provide the public with access to its communications with the EPA about the transmission corridor project. In a letter submitted to USACE on April 25th, the EPA raised concerns regarding USACE's failure to produce organized and transparent information in support of a Clean Water Act Section 404 permit. Furthermore, the EPA recommended that USACE issue a new, updated public notice for the draft Environmental Assessment that USACE is developing for this project. Six months have passed and USACE has yet to produce a response. I believe that the public deserves transparency on this important information and analysis."

"I expressed my concern with USACE's denial of repeated requests for a public hearing."

"Similar projects in New England have offered the public the ability to voice their concerns. For the Northern Pass Transmission Line in New Hampshire, the Department of Energy (DOE) conducted four public hearings across the state. Similarly, in Vermont, the DOE held two public hearings addressing the Clean Power Link Project. I firmly believe that USACE should take steps so that residents in Maine are given the same level of public engagement that was afforded to our neighbors for similar projects."

Finally, he pointed out, to not hold public hearings undermines the Federal government's responsibility to provide We the People of Maine full transparency of all facets of this subject. A subject, which will without doubt prove itself a complete contradiction to what CMP continues shoving down everyone's throats. Make no mistake here—this transmission line will provide far more significantly long term negative environmental and economic consequences for all Maine citizens both in the present and the future.

Everyone in this state deserves to hear the truth concerning all aspects of the long and short term impacts this project poses on our present and all of Maine's future generations. These are specific things which should have been be done before any referendum was heard.

I've brought these concerns to you because everything I've seen CMP doing over the course of

this subject has been saturated in falsities, underhanded pocket stuffing, and outright lies. CMP is an international corporation whose real leadership doesn't even reside in our country...let alone our state. We all recall this corporation knowingly overcharged Maine's citizens on multiple occasions and has openly admitted to their crimes. In addition, they have yet to return what they've stolen, let alone answer in court for those crimes.

And if I haven't provided enough food for thought for you, ask yourselves this: if CMP were a single person, what level of trust would afford him or her based on his or her history? If he or she had been brought before you, the Supreme Court, with the state-wide known list of accusations leveled against him/her over the years, even decades, by the prosecution, and the overwhelming evidence of the sheer truth of said accusations perpetrated on the majority of Maine's population, how would you find this individual? What would his/her sentence be? Is this the kind of person you would trust with the welfare of Maine and all its citizens—present and future?

You were elected to your offices specifically to undermine and punish just this sort of vile behavior. We are all waiting for you to do the right thing. Please don't place our precious resources, environment, and every Maine citizen's welfare in control of an international corporation who has zero concern for our present or future welfare—who includes all of you and your future generations as well.

Please do not support any part of this travesty CMP is trying to force down every Maine citizen's throat including yours and mine. Please reconsider this permit and stand up for all of Maine's citizens both present and future along with their environment.

Respectfully,

David M. Covenant

Thanks,
David Covenant

Dear Maine DEP Jim Beyer,

I'm contacting you because I oppose CMP's corridor. There's ample evidence that the permit should be denied, including the scale of the economic and environmental impact the project will cause.

Thanks,
Lincoln libby
