I can't believe how anyone could find an honest to goodness benefit to Maine or its citizens by accepting the alledged CMP corridor (really a Spain Co) How can you put a dollar\$\$ value on a forever and irreversible scar on our natural resources. They won't stop there, next they will want to spray POISON to kill brush under their line. Our polititions (not all) and decision makers are being shamefully overwhelmed by armies of full time legal and financial experts from multiple huge for profit companies. Our decision makers are actually believing and quoting enviornmental studies paid for by the company seeking approval.

If this CMP corridor ever comes to be real we should LABEL and Name it for a deserving politition.

The only winners would be State of Ma, QH and the Spanish Co that owns our only source of electric power. A few years ago MA refused to grant Maine a source to connect to a gas line. Ma. also rejected off shore wind towers because they were unsightly. Lets stop drooling over the money being offered, MAINE is not for sale.

Thank you

Carlton Pratt
