Re: WWTP Capacity Confirmation Request – Nordic Aquafarms Inc. Sanitary Wastewater Flow
(updated 3/29/2019)

Dear Andrew:

I thank you and Nordic Aquafarms for reconsidering the addition of floor drain wastes to the sanitary wastewater flow. The City has the necessary collection and treatment capacity to accept the estimated average daily flow of 1,500 gallons of sanitary wastewater referenced in your March 14, 2019 letter.

As you have indicated in previous correspondence, Nordic Aquafarms intends to install a pump station on-site and force main line that will connect to the City's collection system on Perkins Road. Ownership, necessary easements, and operation and maintenance of all incremental components of this system will be the responsibility of Nordic Aquafarms to the point of discharge on Perkins Road.

If you have any questions or require additional information please call me at 649-9005.

Sincerely,

Jon Carman, WWTF Superintendent
