Greetings,

I am writing to express my opposition to the Nordic Aquafarms proposal. I have a business in Belfast and reside in Belmont. I have not written a letter such as this in a long time but am moved to at this time because of the grave state of our planet and its inability to defend itself from technologies such as this one, these technologies extract limited and irreplaceable resources from the earth and give nothing back, all in the name of making a dollar for a few human beings.

If this proposal is allowed it will also cause damage to those few resources that we have - by its high carbon footprint, disturbance of mercury and other pollutants in the ocean floor, etc. You have heard all the details already. ***I do not think this is the way of the future, and I hope you will uphold your commitment toward protecting our environment.***

Thank you very much,
