Dear Air Quality Bureau Cayting,

Maine needs to continue with the successful improvement to the impact on its environment and not follow California and its nonscientific rules. I have been working on a \$5 Billion program in California to repurpose old inefficient gas and biomass power plants as well reverse the decommissioning of Diablo Nuclear to help reduce the continued brown outs caused by over demand on the electric grid. Maine does not have the financial means to make this rapid change without planning for controlled growth in low carbon options.

Sincerely,

william Birney
