

Pre-NEAEB Annual Workshop New England Freshwater Fish Assemblages &

Species Identification

March 22, 2016

9:00 am-4:00 pm

Samoset Resort; Rockport, ME

Join Dr. David Halliwell of the Maine DEP for a one-day workshop focused on the taxonomy and field identification of (50+) native and (30+) non-native freshwater fishes residing in lentic and lotic aquatic habitats in New England proper, with an emphasis on confusing minnows, chubs, dace and shiners (Family Cyprinidae). Diadromous (migratory) fish species are included, as well as juvenile life stages and fish species natural hybrids. Most fish species will be available for viewing as preserved specimens (70% alcohol) in glass bottles.

Registration: \$50

(Includes light refreshments and lunch)

To register visit: portal.neiwpc.org/connect.asp
