

EPA Connecticut River Geographic Response Strategy Johns River-Dalton-Lunenburg CR-NH-02							
Tactic #	Purpose	Response Eq	uipment	Deployment Resources	Deployment Notes		
SR-01	Remove spilled oil that has been diverted to a designated recovery site accessible from	1 skimming system1 storage tank or bladder1 hoses, pumps, fittings		2 shore responders	Set up shoreside recovery tactic at general location depicted on map. Some access points located at private residences. Access may be difficult.		
	shore	N/A	Testing Date	Tested			
DV-01	Redirect spilled oil from one location or direction of travel to a specific site for recovery.	2 4	ft protected water boom marine anchor system shoreline anchor system Testing Date	i response boats	Tend through tidal changes. Deploy boom as depicted to divert incoming oil to the collection site. Anchor every 200-300'. Adjust angle as necessary to reduce entrainment. Set up shoreside recovery and tend throughout tide. Deploy shoreside anchor first.		
EX-02	Prohibit oil slicks from entering a sensitive area	4	ft protected water boom marine anchor system shoreline anchor system Testing Date	2 shore responders 1 response boats 1 boat operators N Tested	Tend through tidal changes. Deploy boom as depicted to exclude oil from sensitive areas. Anchor every 200-300'. Not tide dependent Deploy shoreside anchor first.

Johns River Boat Launch staging area looking toward Dalton Rd/RT 135 (June 2021)

Special Considerations

Bivalves may be present in this area. Boom anchoring or any activity that could disrupt the river substrate should be avoided or closely monitored. Shoreline deployment location on or near historic bridge abutment. Avoid impacts to structural components. River conditions, including flow rate and flood stage, vary depending on time of year and heavy rain and/or snowfall. Survey site prior to deployment and modify deployment strategy as appropriate. If ice is present, reevaluate strategy.
