Total Length of Boom	400	feet	<small>Unless otherwise indicated, the boom length given is straight line distance as measured on the map. Actual length required will vary with conditions, and increase with current.</small>

Strategy Implementation

- This is a one piece exclusionary configuration 400 feet long.
1. Establish communications with Command Center.
 2. Park on down river side of road across from horse farm.
 3. Use river current to assist deployment.
 4. Attach one section of boom across the pipe at the river mouth.
 5. Observe deployment for stability.
