

## PFAS Compounds in parts per trillion (ppt)

This Table lists all Maine Public Water Systems (PWS) required to sample for PFAS by 12/31/22. The "PFAS6 Result" column, if populated, represents the sum of the six regulated PFAS compounds in Maine. The results are from finished water samples reported to the Maine CDC Drinking Water Program as compliance samples since June 2021 and processed in the database as of 3/2/2023. Only results that have been verified by a confirmation sample are included unless the PWS has waived their opportunity for a confirmation sample or the results were non-detect. Results will be updated approximately every four weeks. For more information about PFAS, please visit:
