

## I. Standard Cow's Milk-Based, Soy-Based, and Added Rice Starch Formulas (Contract Brand Only)

Contract formulas include standard cow's milk and soy-based formulas and formula with added rice starch produced by the manufacturer which holds the current Maine CDC WIC Nutrition Program formula contract. Currently, Abbott Nutrition provides the contract formula for the Maine CDC WIC Nutrition Program.

**The Maine CDC WIC Nutrition Program does not provide any non-contract standard cow's milk or soy based infant formulas.**

Health care provider prescription requests are not needed for issuance of standard contract formulas that mix to 20kcal/oz at standard dilution for infants 0-12 months of age. Per WIC federal regulations, written health care provider authorization is needed for issuance of standard formulas that mix to 19kcal/oz at standard dilution for infants 0-12 months. Health care providers may use the **Maine WIC Nutrition Program Standing Orders form** to obtain approval for issuance of 19 kcal/oz formulas for infants 0-12 months.

According to WIC federal regulations (7 CFR, Part 246), monthly formula issuance amounts are based on infant age, feeding choice (partially breastfed or fully formula fed) and form of formula (powder, concentrate, ready to feed). Partially breastfed infants needing supplemental formula may receive a maximum of one can of powdered formula in the first 30 days of life, and will have monthly issuance tailored according to individual need throughout the rest of the first year. WIC maximum formula issuance amounts for all infant age groups, feeding choices and forms of formula are included for each item listed.

A prescription is needed for issuance of any formula to children older than 12 months of age. Health care providers may use the **Maine CDC WIC Nutrition Program/MaineCare Request/Prior Authorization for Medical Formula/WIC-Eligible Nutritionals form** to obtain approval for issuance of standard cow's milk or soy formulas for children >12 months.

Prescriptions must include:

- **specific formula name**
- **diagnosis**
- **length of time the product is needed**
- **amount of formula prescribed per day**

**Contract Brand Standard Formulas – 20 kcal/oz – no prescription needed**
