

CENTRAL MAINE DISTRICT: Maternal/Child Health

Perinatal Health

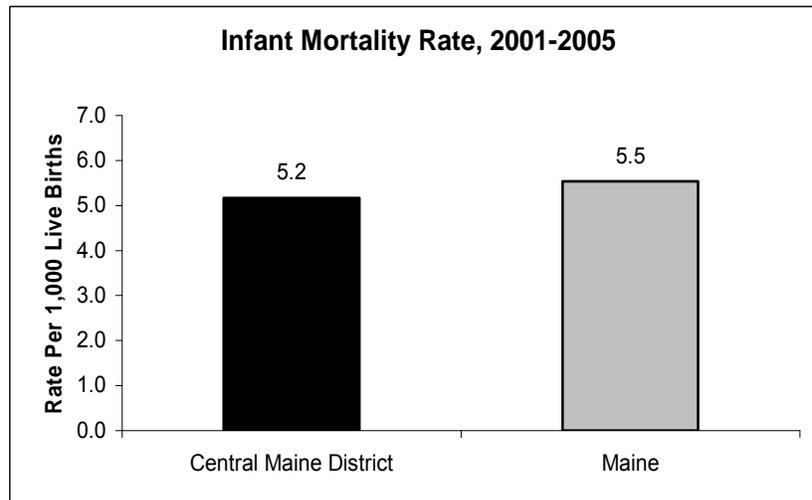

The health of infants often reflects the social, economic, and environmental conditions of a society and the systems of care available to support children and families.

By improving preconception and prenatal care and by enhancing systems of support for women and children, we can help improve birth outcomes and children’s long-term health.

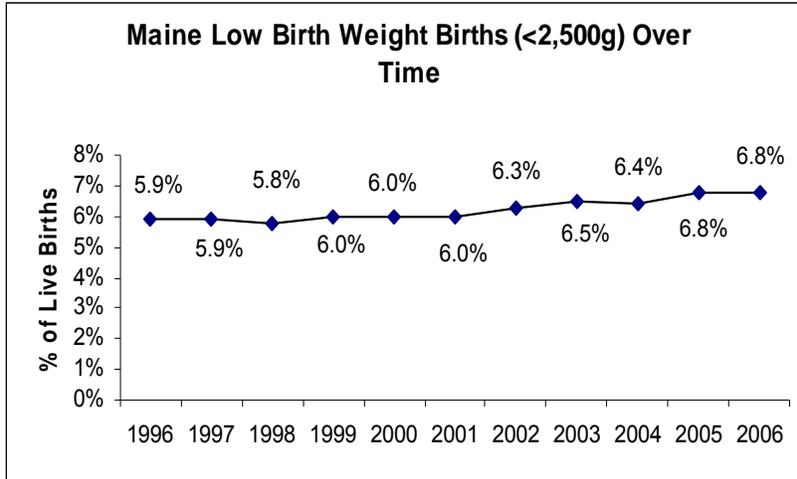

For more information about maternal and child health in Maine, contact Maine CDC’s Division of Family Health, www.maine.gov/dhhs/bohdcfh/FamilyHealth/family.html and for more state-level data on maternal and child health in Maine, please visit: <https://perfddata.hrsa.gov/mchb/mchreports/Search/search.asp>.
