

## **Socio-Economic Status**

Socio-economic status (SES), as measured by factors such as income and educational attainment, is highly related to health status. Numerous health disparities are linked to inequalities in SES.

Mechanisms by which SES contributes to health status include barriers to access of quality health care and prevention, environmental and behavioral factors, and generally high levels of stress. Data on educational attainment and income status, as presented below, are obtained through the Maine Department of Education and the U.S. Census.

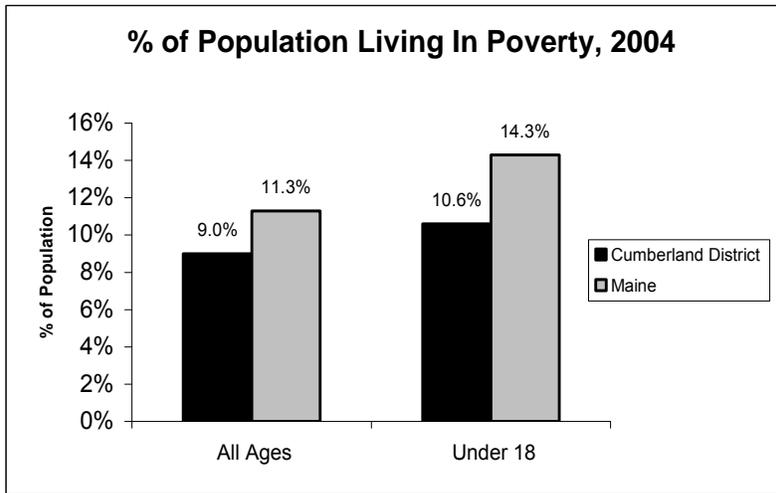

Source: 2000 Census; % of population 25 and older with < high school education

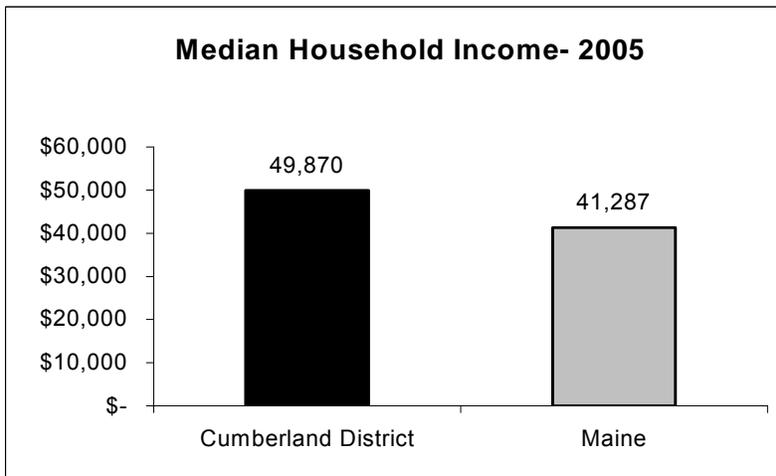

Source: 2004-2005 Maine Department of Education

	<b>Cumberland District Number</b>	<b>Cumberland District Percent</b> (± Margin of Error)	<b>Maine State Percent</b> (± Margin of Error)
Lifetime Educational Attainment Less Than High School <sup>1</sup>	17,946	9.9 (±0.1)	14.6 (±0.1)
High School Completion <sup>2</sup>	2,678	88.8 (±3.4)	87.5 (±1.5)
