

Member/participation status	What worked well for you at today's meeting?	What could be improved?	Did the format of the meeting allow you to participate and feel engaged in discussions and presentations? In what ways?	What topics/content would you like to discuss at upcoming SCC Meetings?
SCC member – substitute delegate	Learned about interesting research initiatives and projects; good discussion on DCC governance.	Clearer purpose of the meeting and role of SCC; [redacted] legislative mandate.	Very engaged	Linkages between public and affordable health care initiatives (e.g. medical homes, care [redacted]; impact of rapidly growing elder population on public health.
SCC member	Process; agenda content.	The layout of the room is challenging – is there enough space to put us in a rectangle, so all attendees can see one another?		Health equity – implementation plans/success stories; how we can further engage hospitals/health systems into not only the SCC, but public/population health.
SCC member	Flow and topic very pertinent to true work being done; good to see remote being worked on with Go To Meeting.		Somewhat engaged.	Reduction in funding potential.
SCC member	Presentations were helpful and engaging to participants.		Somewhat engaged.	Preparation of some legislative education – engage legislative champion to be an SCC member or ex-officio.
SCC member	Better discussions and presentations – much better than last meeting.	Decrease length of meeting.	Very engaged.	
Key stakeholder	Discussion about DCC; tribal presentation.	Hard to hear if air is on; hot if it's not.	Very engaged.  Open discussion	
Key stakeholder	It was wonderful to hear at least a few of the findings from the tribal health survey.	No matter the time of year, the room is too hot. Please start using a microphone and speaker system so that we can run the AC and hear the speakers.	Somewhat engaged.  Q&A	CTG updated/revised work plan – in more detail.
Interested party	Nice division of topics.	Cut to 3 hours – people started leaving; challenge to give up that much time.	Somewhat engaged	
Interested party	Keeping to schedule; most of the presentations were good and worthwhile except the presentation by Dr. Gail Dana-Saco, which seemed disjointed and I did not take away from.		Somewhat engaged.	

Member/participation status	What worked well for you at today's meeting?	What could be improved?	Did the format of the meeting allow you to participate and feel engaged in discussions and presentations? In what ways?	What topics/content would you like to discuss at upcoming SCC Meetings?
Interested party	I like the quick introductions at the start of the meeting.	Perhaps a less packed agenda so the group has an opportunity to have more in-depth conversations on various topics, i.e. the conversation that grew from the Beacon presentation; name plates for attendees should be left for pick-up at table with packets – confusing to have to walk around to find your name.	Not engaged  As mentioned above, too little time to discuss topics after presentations.	Any ongoing work in the refugee/new American communities.
Interested party	I liked having meatier content on the agenda, i.e. the Bangor Beacon presentation and the Health Disparities-Health Equity.	Would like to have time after the meatier presentations for more discussion about what the SCC can do to actualize the key info in the presentations – what is the SCC's role in applying the key points to improve public health and health outcomes in Maine?	Somewhat engaged	
Interested party – student	Agenda was helpful, along with speakers name; possibly including their occupation/organization they are involved with and representing.	Nothing	Very engaged  Presenters allowed for questions/comments and conversations throughout presentations. Relaxed professional environment made me feel more comfortable in this setting.	Worksite wellness/more on occupational health.
Interested party	Good variety of presentations and updates.	Somewhat distracting when people leave early.	Somewhat engaged.  All the speakers provided opportunities for questions.	Migrant health; immigrant/refugee health.
Interested party	Presentations...good info.		Very engaged.  Good time for Q&A.	Adverse childhood experiences (ACEs).
Interested party	Slide presentation ( ).	Lunch period; more breaks.	Very engaged.  Question and answer period.	Tribal involvement/participation.
