

ACTIVE SHOOTER PREPAREDNESS WEBINAR

**Thursday, November 19, 2026
1:00 p.m. Eastern Time**

THIS IS NOT A TACTICAL TRAINING COURSE

The Cybersecurity and Infrastructure Security Agency (CISA) Region 1 (Connecticut, Massachusetts, Maine, New Hampshire, Rhode Island, and Vermont) invites you to participate in a two-hour security webinar designed to enhance your organization's readiness and resilience in the event of an active shooter incident.

Preparing personnel for a potential active shooter situation is a critical component of organizational emergency and response planning. Because these incidents are often unpredictable and can escalate rapidly, understanding how to respond—and acting quickly—can save lives. Every second counts, and informed, practiced response strategies can make a meaningful difference during an emergency.

Objectives

- Discuss the elements of active shooter incident response planning with guidance from expert instructors.
- Describe common behaviors, potential violence indicators, and situations associated with active shooter incidents.
- Share best practices, communications protocols, and resources to assist stakeholders in developing or enhancing their emergency planning, preparedness, and response to active shooter incidents.

Agenda Overview

- **Recognition:** Defining the threat
- **Prevention:** Strategies to help prevent an incident
- **Protection:** Security measure considerations
- **Mitigation:** Actions to minimize consequences
- **Response:** Considering actions during an incident
- **Recovery:** Transitioning to a "new normal"
- **Introduction to Emergency Action Plan Development**
