

EHR Incentive Programs in 2015: Alternate Exclusions & Specifications

CMS recently published a final rule that specifies criteria that eligible professionals (EPs), eligible hospitals, and critical access hospitals (CAHs) must meet in order to participate in the Medicare and Medicaid Electronic Health Record (EHR) Incentive Programs. The final rule's provisions encompass 2015 through 2017 as well as Stage 3 in 2018 and beyond.

The final rule includes alternate exclusions and specifications for certain objectives and measures where there is not a Stage 1 measure equivalent to the Modified Stage 2 (2015 through 2017) measure or where a menu measure is now a requirement.

Overview of Alternate Exclusions and Specifications

To assist providers who may have already started working on meaningful use in 2015, there are alternate exclusions and specifications within individual objectives for providers. These include:

- Allowing providers who were previously scheduled to be in a Stage 1 EHR reporting period for 2015 to use a lower threshold for certain measures.
- Allowing providers to exclude for Stage 2 measures in 2015 for which there is no Stage 1 equivalent.
- Allowing providers to claim an alternate exclusion where previously a menu measure is now a requirement.

Alternate exclusions are based on the provider's scheduled stage and are available only for 2015 (and in 2016 for some limited cases). They are intended to accommodate changes required for the transition to the Modified Stage 2 objectives and measures.

There are also exclusions for some measures that are *not* based on the provider's stage, but on other factors as there have been in both Stage 1 and Stage 2 of the program. These exclusions—which are described for each measure as applicable—are specific to the measure and not dependent on the Stage or year of participation.

How to Attest Using Alternate Exclusions and Specifications

Providers scheduled to be in Stage 1 may opt to use the alternate exclusions and specifications, but they **are not required** to use them. The Medicare and Medicaid EHR Incentive Programs registration and attestation system will automatically identify those providers who are eligible for alternate exclusions and specifications. Upon attestation, these providers will be offered the option to attest to the Modified Stage 2 objective and measure, *and* the option to attest to the alternate specification or claim the alternate exclusion, if available. The provider may independently select the option available to them for each measure for which an alternate specification or exclusion may apply.

2015 Alternate Exclusions and Specifications

There are **9 objectives for EPs** that include alternate exclusions and specifications for providers in 2015.
