2.	Karleen provided an overview of the PowerPoint Presentation. Spoke about current issues, new items, and how to interpret the Remittance Advice Summary page.
3.	Peter Gray spoke about MIHMS and other options for processing COB claims in the system. He also will provide an overview of how the current system is processing COBA, and TPL claims at a future PAG/TAG Meeting.
4.	David Winslow asked about APC outliers and if they are identified somehow. Cheryl will follow up to see if this could be accomplished by adding to the weekly hospital report.
