Dual Processing Reminder	Page #8
Summary	Page #9

# Recap of Cutover Weekend

---

- Cutover activities were completed and MIHMS was available January 17
  - MIHMS is now operating from a Molina facility in New Mexico; no longer from legacy UNISYS-controlled facility
- System functionality post-cutover was carefully monitored by State/Molina team to make sure that MIHMS was functioning as normal
  - Batch processing, including eligibility and financial cycles
  - Claims payment – post cutover review by State and Molina QA teams
  - Connectivity to internal and external vendors – staff met daily to monitor connectivity and help desk issues

# Timeline for Accepting HIPAA Version 5010

---

- Current schedule is that Molina will go-live accepting 5010 claims by March 1.
- Resolution of critical defects is pre-requisite for 5010 “Go Live”
- We will be in regular communication with the provider community during this transition through listserv messages and MaineCare’s [HIPAA Version 5010 & ICD-10 site](#).

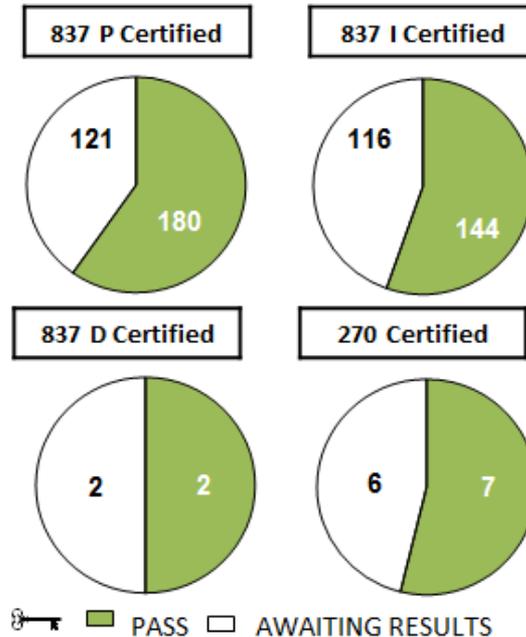

# Resolution of Critical Defects

TR #	Description	Status
5716	5010\Service location: When a file has multiple transactions, one transaction doesn't have SL, entire file fails	Complete

5778	Defect #671: 835s are failing HIPAA validation due to the claim service line being out of balance for 5010	Ready/ Testing in UAT
5804	New EDIFECs version	Ready/ Testing in UAT

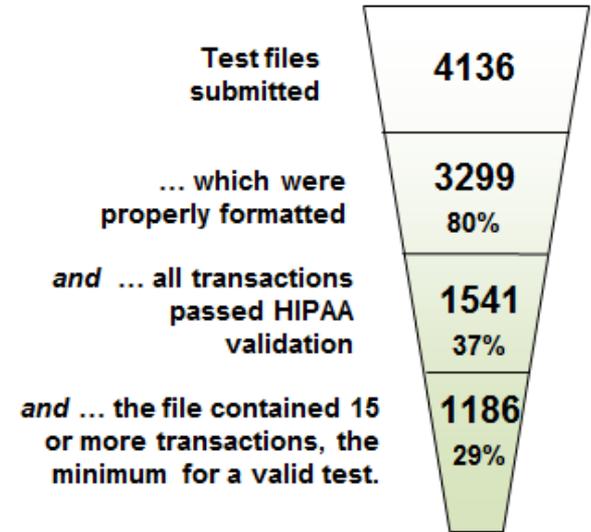

# Trading Partner Certification Status

- Two-thirds of HIPAA Version 4010 certified trading partners have either started testing or are certified to submit HIPAA Version 5010.

Number of Certifications by Transaction Type

Test File Requirements Breakdown

- Developed a 60-day trading partner outreach plan to contact trading partners who have either not started testing or who have started but have not become certified.

# 60 Day Provider Outreach Plan

---

- Objective is to continue to build awareness that trading partners must become HIPAA Version 5010 certified in order to submit electronically to MIHMS.
- Target audiences include non-certified trading partners:
  - **High Billing Amounts:** Trading partners who bill a substantial amount to MaineCare are a very high priority for certification. There are 28 trading partners who collectively account for 62% of the total amount billed electronically to MaineCare and **15** are not certified.
  - **In Progress:** These trading partners have started testing, but have not completed certification.
  - **Not Started:** These trading partners have not started certification testing. There are **124** trading partner that have not started testing but have submitted production in the month of December

# Dual Processing Reminder

---

- MaineCare will continue to accept HIPAA Version 4010 transactions until March 31, 2012. After March 31, 2012, any 4010 transaction will be rejected.
- If you are a trading partner that is unable to submit 5010 transactions after March 31, 2012, your claims submission will need to be via Direct Data Entry (DDE) or through paper claims.

# Summary

---

- Complete your HIPAA Version 5010 certification if you haven't done so already!
- If you have suggestions on ways to further trading partner certification testing, we welcome your feedback. Please send your suggestions to Matt Galletta at [Matt.W.Galletta@maine.gov](mailto:Matt.W.Galletta@maine.gov).
